II. Discussion

Draft NUREG–1478, Revision 3, improves research and test reactors operator licensing current processes and clarifies guidance as needed. Draft NUREG–1478, Revision 3 provides policies, procedures, and practices for the development, administration, and grading of examinations used for licensing operators at research and test reactors under the NRC's regulations in part 55 of title 10 of the *Code of Federal Regulations*, “Operators’ Licenses.” This draft NUREG also provides guidance for maintaining operators’ licenses and for the NRC to conduct requalification examinations when necessary. The NRC is issuing the draft NUREG to (1) incorporate the use of electronic systems and technology for application submittals and supporting facility documentation, (2) include current regulatory requirements pertaining to operator licensing at research and test reactors, (3) adjust grading criteria for the written examination to provide consistent and accurate grading, and (4) reorganize the examination standards to provide a streamlined topic-based approach.
