

Project No. 2611. The project is located on the Kennebec River in Kennebec and Somerset counties, Maine.

The licensee proposes to maintain its reservoir elevation at 78 feet, 3 feet lower than the normal elevation of 81 feet, by temporarily installing 3-foot-high flashboards rather than the normal 6-foot-high flashboards. The licensee states lowering the reservoir by 3 feet would allow for repairs to a damaged spillway gate while also keeping the reservoir high enough to use its downstream fish passage facility and to possibly submerge rapids near the town of Fairfield to improve boater safety. The applicant intends to install the temporary flashboards as soon as personnel can safely access the spillway but no later than shortly after spring runoff subsides, and to replace them with the normal, 6-foot-high flashboards once the gate is repaired, but no later than December 31, 2025.

On March 30, 2025, the Commission issued a public notice for the proposed amendment. The public comment period closed on April 28, 2025 and no filings were made in response to the public notice.

This notice identifies Commission staff's intent to prepare an environmental assessment (EA) for the project.¹ The planned schedule for the completion of the EA is May 30, 2025. Revisions to the schedule may be made as appropriate.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Any questions regarding this notice may be directed to Steven Sachs at 202-502-8666 or Steven.Sachs@ferc.gov.

Dated: May 7, 2025.

Carlos D. Clay,

Deputy Secretary.

Federal Energy Regulatory Commission

[Docket No. CP21-44-003]

LA Storage, LLC; Notice of Request for Extension of Time

Take notice that on April 30, 2025, LA Storage, LLC (LA Storage) requested that the Commission grant an extension of time, until September 23, 2030, to construct and place into service its Hackberry Storage Project (Project) located in Calcasieu Parish, Louisiana as authorized in the Order Issuing Certificate (Order).¹ The Order required LA Storage to complete construction of the Project and make it available for service within three years of the date of the Order, or by September 23, 2025.

LA Storage has obtained all necessary Federal, state, and local authorizations and was authorized to begin construction of the Project on November 21, 2024.² Subsequently, LA Storage has commenced construction activities on pipeline, compressor station, brine and appurtenant facilities in March 2025. Despite its good faith efforts to advance the project, the proposed schedule requires the need to sequence construction activities, then request and receive additional incremental agency approvals necessary to complete construction. As a result, LA Storage does not anticipate completing construction prior to September 23, 2025. LA Storage therefore requests an extension of time until September 23, 2030 to complete construction of the Project and make it available for service.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on LA Storage's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension

requests that are contested,³ the Commission will aim to issue an order acting on the request within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁷ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<https://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.
