

PAI's shallow hazards survey will not have an unmitigable adverse impact on the availability of ringed, bearded and spotted seals needed for subsistence.

Proposed Authorization

NMFS proposes to issue an IHA to BP/EM/PAI to take certain species of marine mammals incidental to conducting a shallow hazards survey during the 2001 Alaskan Beaufort Sea open water season, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activity would result in the harassment of only small numbers of bowhead whales, beluga whales, ringed seals, bearded seals, and possibly spotted seals and gray whales; would have no more than a negligible impact on these marine mammal stocks; and would not have an unmitigable adverse impact on the availability of marine mammal stocks for subsistence uses.

Information Solicited

NMFS requests interested persons to submit comments, and information, concerning this request (see **ADDRESSES**).

Dated: May 23, 2001.

Wanda L. Cain,

Acting Deputy Director, Office of Protected Resources, National Marine Fisheries Service.
