Another subset of 24 adults would be examined internally using laparoscopic techniques and each would also have gonad biopsy and blood samples taken for analyses. Additionally, lethal takes of up to 500 eggs and larvae each year would be collected during seasonal spawning activity by artificial substrate, D-frame ichthyoplankton net, and/or epibenthic sled. SUPPLEMENTARY INFORMATION:**Background**

On August 31, 2009, the Department published the preliminary results of the new shipper review of the antidumping duty order on circular welded carbon steel pipes and tubes (pipes and tubes) from Thailand for the period March 1, 2008 through September 30, 2008. See *Circular Welded Carbon Steel Pipes and Tubes from Thailand: Preliminary Results of Antidumping Duty New Shipper Review*, 74 FR 44825 (August 31, 2009) (*Preliminary Results*). This review covers the respondent, Pacific Pipe Public Company, Limited (Pacific Pipe), a producer/exporter of the subject merchandise to the United States.

Extension of Time Limit for Final Results

The final results of this new shipper review are currently due on November 22, 2009. See section 751(a)(2)(B)(iv) of the Act and 19 CFR 351.214(i)(2). In this new shipper review, the Department conducted verification after the publication of the *Preliminary Results*.
