Economic Research Service

Title: Rural Establishment Innovation Survey (REIS).

OMB Control Number: 0536-NEW.

Summary of Collection: The Economic Research Service (ERS) plans to conduct the Rural Establishment Innovation Survey (REIS) as a one-time inquiry. The proposed collection will contribute to a better understanding of how international competition and the increasing knowledge intensity of economic activity in the U.S. are affecting the vitality of rural areas and effective adjustment of these pressures. Data obtain from the survey will allow ERS to examine the prevalence of innovation activity in nonmetropolitan businesses and those establishment and community-level characteristics associated with innovation. Information will be collected using a multi-mode survey where respondents will be able to complete the survey via telephone interview or by either completing a questionnaire sent via mail or available electronically through a secure web link. The legal authority for collecting this information is the Rural Development Act of 1972 U.S.C. 2662(b).

Need and Use of the Information: The data collected through the survey will help fill serious gaps in ERS understanding of what rural establishments need to be competitive in the national and global economics and provide USDA and other policymakers with sound information so they can craft more effective rural development policies. The results will inform the degree to which human capital endowments; access to credit; access to infrastructure; and potentially more limited interaction with suppliers, customers, and peer firms impedes processes of rural innovation. Failure to collect this information will severely limit the evidentiary basis for improving the innovative capacity of business

establishments located in less favorable areas.

Description of Respondents: Business or other for-profit; Not-for-profit institutions.

Number of Respondents: 34,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 15,369.
