

whether there is any new information with respect to the environment or the environmental impacts of the SHINE facility, including information that is different from that considered in NUREG-2183. NRC staff did not identify any information that presented a considerably different picture of the environmental consequences of constructing, operating, and decommissioning the SHINE facility. After weighing the environmental, economic, technical, and other benefits against environmental and other costs, NRC staff's recommendation, unless safety issues mandate otherwise, was that the operating license be issued as proposed. NRC staff based its recommendation on the following: the application, including SHINE's supplemental environmental report; consultation with Federal, State, Tribal, and local agencies; the staff's independent review; and the consideration of public comments.

Decision

NNSA intends to issue a modification to its cooperative agreement with SHINE Technologies, DE-NA0004010, to revise the scope of the agreement to include cost-share funding for facility construction to support deployment of this non-HEU Mo-99 production technology. Issuance of the modification is subject to satisfactory completion of pricing and other technical reviews. This modification reflects a reallocation of funding previously awarded to DE-NA0004010 and does not increase the agreement's total funding level.

Basis for Decision

The environmental impacts of this proposed action have been previously addressed in NUREG-2183, "Environmental Impact Statement for the SHINE Medical Radioisotope Production Facility," and NUREG-2183, Supplement 1, "Environmental Impact Statement Related to the Operating License for the SHINE Medical Isotope Production Facility." NNSA was a cooperating agency for both the EIS and supplement and after an independent review and determined that its comments and suggestions were satisfied per 40 CFR 1506.3(b)(2). NNSA's proposed action is substantially the same as the proposed action analyzed in NRC's EIS and supplement.

Kern River Gas Transmission Company; Notice of Staff Protest to Proposed Blanket Certificate Activity

Federal Energy Regulatory Commission (FERC or Commission) staff (Protestor) hereby protests the prior notice request filed under the provisions of the Commission's regulations at part 157, subpart F, by Kern River Gas Transmission Company (Kern River) on December 15, 2023, in the above-referenced docket. Pursuant to its Part 157, subpart F, blanket certificate authority, Kern River proposes to construct and operate the Lanes Crossing Meter Station (Project), within Kern River's existing Victorville Meter Station at the High Desert Power Plant, San Bernardino County, California. Protestor seeks to have this prior notice request processed as a case-specific application filed under section 7(c) of the Natural Gas Act (NGA) and Part 157, subpart A, of the Commission's regulations.¹

Protestor notes that Kern River did not provide a copy of a finding by the California State Historic Preservation

¹ Section 157.205(f) provides that a protested prior notice filing shall be treated as though it had filed a case-specific application under NGA section 7, unless, pursuant to section 157.205(g), the protestor withdraws its protest within 30 days after protests were due.

Office of “no historic properties” or “no historic properties effected.” This documentation is necessary to demonstrate the Project’s compliance with the National Historic Preservation Act, as required under the Commission’s regulations at section 157.208(c)(9) and Appendix II of subpart F. Without this documentation, the environmental concerns cannot be adequately addressed before the protest period expires on February 26, 2024.

Dated: February 26, 2024.

Debbie-Anne A. Reese,
Acting Secretary.
