

representative samples using transparent methodology. The BTOS will produce data continuously, in part as a response to feedback on the SBPS that longer time series would have been useful to contextualize the pandemic impact. Continuous data will allow for the measurement of economic trends during all phases of the business cycle as well as during times of economic and other emergencies. The BTOS will uniquely provide the ability to produce these data and associated measures of quality.

The BTOS data series will provide insight on the state of the economy, prior to and during an event (including but not limited to natural disasters or economic crises) and will assist in monitoring the recovery from the event. It will also be useful in understanding aggregate and subaggregate changes in economic trends throughout the business cycle. BTOS data may be used by elected officials, government program officials, policy makers, industry leaders, economic and social analysts, business entrepreneurs, business and economic news organizations, and domestic and foreign researchers in academia, business, and government.

The BTOS will allow for a large number of data products that are complementary to the Census Bureau's existing monthly and quarterly economic indicator programs which provide estimates of contemporaneous economic activity at the national sector level. The BTOS will produce complementary disaggregate contemporaneous data as well as data that reflect the outlook of businesses. The BTOS will be complementary to the Census Bureau's existing annual programs, serving as a platform through which trends and data gaps may first be identified for subsequent inclusion in annual programs.

The BTOS instrument will include core and supplemental content. Core content will form the basis of the instrument and run continuously; core content will include measures of economic activity that are applicable across all non-farm sectors and are important across the business cycle and during economic or other emergencies. Supplemental content will be included on the instrument with a regular periodicity and will be designed to provide urgently needed data on an emerging or current issue.

Core concepts for the BTOS will be selected based on research and analysis conducted during the SBPS, stakeholder feedback, and the ability to collect complementary items on monthly,

quarterly, annual, or census programs to provide context and benchmarking.

Initially, all data products will be accessible through the Census Bureau's Experimental Data Products site. Experimental data products are clearly identified and include methodology and supporting research with their release.

Affected Public: Business or other for-profit organizations.

Frequency: Bi-weekly.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Sections 131 and 182.

Foreign-Trade Zones Board

[B-05-2022]

Foreign-Trade Zone (FTZ) 99—Wilmington, Delaware, Notification of Proposed Production Activity AstraZeneca Pharmaceuticals, LP (Pharmaceutical Products), Newark, Delaware

AstraZeneca Pharmaceuticals, LP submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Newark, Delaware within Subzone 99D. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on February 16, 2022.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status materials and specific finished products described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity

under FTZ procedures are explained in the background section of the Board's website—accessible via www.trade.gov/ftz. The proposed finished products and materials would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed finished products include: BRILINTA (ticagrelor) tablets; LYNPARZA (olaparib) tablets; SEROQUEL IR (quetiapine fumarate) tablets; and, SEROQUEL XR (quetiapine fumarate) tablets (duty-free).

The proposed foreign-status materials include: Anastrozole active pharmaceutical ingredient (API); olaparib API; quetiapine fumarate API; and, ticagrelor API (duty rates 6.5%). The request indicates that olaparib API and ticagrelor API are subject to duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is April 6, 2022.

A copy of the notification will be available for public inspection in the "Online FTZ Information System" section of the Board's website.

For further information, contact Christopher Wedderburn at Chris.Wedderburn@trade.gov.

Dated: February 18, 2022.

Andrew McGilvray,

Executive Secretary.
