6. A commenter stated the DOD should develop policies promoting small business cooperation. The Government fully supports the development of small business and utilizes small business throughout the DOD; however, the Government must also support the National Airlift Policy. National Airlift Policy provides that where appropriate, US policies shall be designed to enhance the mobilization base of the US commercial air carrier industry. During peacetime, DOD requirements for passenger and cargo airlift augmentation shall be satisfied by the procurement of airlift from commercial air carriers participating in the CRAF program, to the extent that DOD determines such airlift is suitable and responsive to military requirements.

7. A commenter recommended an impact study to determine effects of the intended change. The Government accomplished a business segment analysis, identified risks and opportunities, discussed policy options in a joint agency environment, and supports the intended effects the change will have on promoting CRAF participation.

8. Commenters presented stand-alone comments on other DOD programs and support they have provided to specific locations. The Government appreciates the support provided in other programs, but notes that the proposed policy is limited to the DOD domestic air tender program and will result in consistent eligibility requirements across all DOD air cargo programs.
