

requirements for the General Provisions of 40 CFR part 60, subpart A, as well as for the specific requirements in 40 CFR part 60, subparts T, U, V, W and X. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or for any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Phosphate fertilizer manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subparts T, U, V, W, and X).

Estimated number of respondents: 13 (total).

Frequency of response: Semiannually.

Total estimated burden: 1,390 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$484,000 (per year), which includes \$320,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup and/or operation and maintenance (O&M) costs.

Director, Regulatory Support Division.

Abstract: Owners and operators of synthetic fiber production facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the applicable specific standards found at 40 CFR part 60, subpart HHH. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Synthetic fiber production plants with a solvent-spun, synthetic fiber process that produce more than 500 megagrams (Mgs) of fiber per year.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart HHH).

Estimated number of respondents: 22 (total).

Frequency of response: Initially, semiannually, and quarterly.

Total estimated burden: 1,880 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$388,000 (per year), which includes \$165,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or

operation and maintenance (O&M) costs.
