### National Oceanic and Atmospheric Administration

#### National Estuarine Research Reserve System

**AGENCY:** Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

**ACTION:** Notice of Public Comment Period for the Grand Bay, Mississippi National Estuarine Research Reserve Management Plan and the Delaware National Estuarine Research Reserve Management Plan revisions.

**SUMMARY:** Notice is hereby given that the Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce is announcing a thirty day public comment period for the Grand Bay, Mississippi National Estuarine Research Reserve Management Plan and the Delaware National Estuarine Research Reserve Management Plan revisions. Pursuant to 15 CFR Section 921.33(c), the revised plans will bring the reserves into compliance. The Grand Bay Reserve and Delaware Reserve revised plans will replace the plans approved in 1999 and 2004 respectively. Both revised management plans outline the administrative structure; the research & monitoring, education, training, and stewardship goals of the reserve; and the plans for future land acquisition and facility development to

support reserve operations. The Grand Bay Reserve takes an integrated approach to management, linking research, education, training and stewardship functions to address high priority issues including climate change, threats to reserve resources and ecological functions, watershed development, and changes in water quality. Since the last management plan, the reserve has built out its core programs and monitoring infrastructure; constructed a L.E.E.D. certified Coastal Resources Center that includes laboratories, offices, classrooms, interpretative areas and dormitories; and created interpretive trails.

With the approval of this management plan, the Grand Bay Reserve will decrease their total acreage from 18,400 acres to 18,049. The change is attributable to accuracy adjustments based on improved geographic information for the site. The revised management plan will serve as the guiding document for the 18,049 acre Grand Bay Reserve for the next five years. The Delaware management plan will focus on improving the scientific understanding of estuarine and coastal ecosystems; improving public awareness and environmental literacy to enable environmentally sustainable decision-making; and protecting, managing and restoring the reserve to serve as a model site for sustainable community stewardship. Notable changes in the revised plan include a boundary expansion, a new coastal training program, implementation of the Blackbird Creek Reserve Master Ecological Restoration Plan, the opening of the Blackbird Creek Stewardship Center and facility improvements to the St. Jones Coastal Training Center. With the approval of this management plan, the Delaware Reserve will increase their total acreage from 4,930 acres to 6,206. The change is attributable to acquisition of two parcels, totaling 64.3 acres, and increased mapping accuracy. The two parcels possess high ecological value and increased opportunities for research, education, and restoration. The revised management plan will serve as the guiding document for the 6,206 acre Delaware Reserve for the next five years. #### National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration; Northwest Fisheries Science Center; Online Webinar

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of online webinar.

**SUMMARY:** The Northwest Fisheries Science Center (NWFS) will hold an online Pre-Assessment Workshop webinar to provide an overview of the data sources, data trends and population models that will be used in the upcoming Pacific coast groundfish stock assessments for rougheye rockfish, aurora rockfish, shortspine thornyhead and longspine thornyhead. The online NWFS Pre-Assessment Workshop webinar is open to the public, although space for online access is limited to the first 25 participants.

**DATES:** The NWFS Pre-Assessment Workshop webinar will commence at 1 p.m. PST, Tuesday, May 28, 2013 and continue until 4 p.m. or as necessary to complete business for the day.

**ADDRESSES:** See **SUPPLEMENTARY INFORMATION** for specific addresses and all other necessary information pertaining to the webinar.

*Science Center address:* Northwest Fisheries Science Center, 2725 Montlake Boulevard East, Seattle, WA 98112.

**FOR FURTHER INFORMATION CONTACT:** Ms. Stacey Miller, NMFS Northwest Fisheries Science Center; telephone: (541) 867-0562.

**SUPPLEMENTARY INFORMATION:** To attend the NWFS Pre-Assessment webinar, please reserve your seat by visiting: <https://nwfsfram.webex.com/nwfsfram/j.php?ED=19623343&UID=>

OR 97220-1384, Telephone: (503) 820-2280.

To attend the webinar at the Northwest Fisheries Science Center listening stations in Seattle, WA or Newport, OR, members of the general public who are not National Marine Fisheries Service employees need to provide photo identification. Foreign nationals, where a foreign national is an individual who is not a citizen of the United States, not a legal permanent resident (meaning not a "permanent resident alien" or "Green Card" holder), and not a "protected individual" under 8 U.S.C. 1324b(a)(3), intending to attend the webinar at either of the Northwest Fisheries Science Centers must notify Ms. Stacey Miller, (541) 867-0562, at the Northwest Fisheries Science Center at least 2 weeks prior to the webinar.

Public comments during the webinar will be received from attendees at one of the public listening stations as well as by participants who have pre-registered and are listening from remote locations.

The specific objectives of the NWFSC Pre-Assessment Workshop webinar are to: (1) Present and describe data that may be included in the stock assessment modeling for rougheye rockfish, aurora rockfish, longspine thornyhead and shortspine thornyhead; (2) discuss the interpretation of data given historical and current fishing practices and changes in fishing regulations; (3) discuss approaches for improving stock assessment modeling efforts; and (4) identify data gaps and future research possibilities. No management actions will be decided in this workshop.

All visitors to the National Marine Fisheries Service science centers should bring photo identification to the meeting location. Visitors who are foreign nationals (defined as a person who is not a citizen or national of the United States) will require additional security clearance to access the NOAA facilities. Foreign national visitors should contact Ms. Stacey Miller at (541) 867-0562 at least 2 weeks prior to the meeting date to initiate the security clearance process.

Although non-emergency issues not identified in the webinar agenda may come before the webinar participants for discussion, those issues may not be the subject of formal action during this webinar. Formal action at the workshop will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the webinar

participants' intent to take final action to address the emergency.

### Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for auxiliary aids should be directed to Ms. Stacey Miller at (541) 867-0562 at least 5 days prior to the webinar date.
