

The Program will encompass the VRRFP and VSCAS so that actions identified in these documents can be funded, implemented, and evaluated for effectiveness. In addition, the Program will provide measures to offset proposed Federal project impacts during section 7 consultations in order to prevent future conflict over water development and minimize impacts of Federal projects on protected aquatic species. Goals and objectives of the Program are based on recovery of the endangered fish and conservation of Virgin spinedace in an environment of continuing water development. Although some impacts to native species are expected through future water development projects, recovery actions have been and will continue to be implemented in advance of project impacts such that the status of species and/or its habitat is expected to improve and remain greater than that necessary to offset anticipated impacts. A crediting system has been developed to assess, measure, and track benefits and impacts of projects and is designed to maintain measured benefits at a higher level than impacts so that the Program is always moving toward recovery and conservation of protected species.

Although participation is limited to Utah portions of the Virgin River basin at this time, it is expected that the remaining portions of the Virgin River basin in Arizona and Nevada will be invited to participate in the Program in future years, as it becomes better established and demonstrates effectiveness.

It is important to note that participation in this Program does not represent or guarantee legal authority for any water development project. Such projects must be evaluated individually as they are proposed and continue to be subject to all applicable Federal and State laws, including the National Environmental Policy Act and the Endangered Species Act. This EA is not intended to provide analysis for specific project impacts but rather analyzes only effects of Federal participation in the Program.

Author

Acting Regional Director, Denver, CO.

Finding of No Significant Impact—Federal Participation in the Virgin River Resource Management and Recovery Program

The U.S. Fish and Wildlife Service, as lead agency, with the Bureau of Land Management and National Park Service as cooperating agencies, propose to participate in the Virgin River Resource Management and Recovery Program (Program). The Program will be a multiagency program designed to implement recovery actions for two endangered fish species, the roundfin and the Virgin River chub. It also will implement conservation actions for the Virgin spinedace, a species being managed as sensitive by the State of Utah and subject of a conservation agreement. In addition to implementing recovery actions, the Program will facilitate resolution of conflicts between endangered species protection and water development in the Virgin River Basin in Utah by providing actions to improve the status of these species so that proposed water development will not jeopardize these species existence or adversely modify their critical habitat. Other Program participants will be the State of Utah Department of Natural Resources, the Washington County Water Conservancy District, and Grand Canyon Trust, a local nonprofit environmental conservation group.

An Environmental Assessment was prepared which addressed three alternatives: (A) a no action alternative whereby the Federal agencies would not participate in the Program but would continue to administer and comply with the Endangered Species Act (Act) as previously done; (B) Federal agency participation in the Program which describes a process for administration and compliance with the Act that provides for full implementation of recovery and conservation actions for the protected fish species, as well as providing a mechanism for section 7 compliance of the Act that reduces conflict in the Utah portion of the Virgin River basin; and (C) Federal agency participation in a basinwide recovery program that includes implementation of the Program in Arizona and Nevada, as well as Utah.

Alternative B, the Preferred Alternative, will result in the most effective participation by Department of the Interior agencies, State and local agencies, and organizations to coordinate, direct, and fund recovery actions for imperiled aquatic fish species in the Basin in Utah. It also will facilitate implementation of the Virgin River Resource Management and Recovery Program that was developed by resource agencies in Utah.

Based on my review and evaluation of the Environmental Assessment and supporting documentation, I have determined that Federal agency participation in the Virgin River Resource and Management Program is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(c) of the National Environmental

Policy Act of 1969. Accordingly, preparation of an environmental impact statement is not required.

Dated: May 30, 2001.

Duane K. McDermond,
Acting Regional Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO-930-1430-ET; COC-017768]

Public Land Order No. 7488; Extension of Public Land Order No. 5979; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order extends Public Land Order No. 5979 for an additional 20-year period. This extension is necessary to continue the protection of two Bureau of Land Management administrative sites. The lands have been and will remain open to mineral leasing.

EFFECTIVE DATE: September 3, 2001.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215-7093, 303-239-3706.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1994), it is ordered as follows:

1. Public Land Order No. 5979, which withdrew public lands to protect two Bureau of Land Management administrative sites, is hereby extended for an additional 20-year period following its date of expiration.

2. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted prior to the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f) (1994), the Secretary determines that the withdrawal shall be extended.

Dated: May 29, 2001.

Gale A. Norton,
Secretary of the Interior.
