Consultation

A detailed assessment of the associated funerary object was made by the Gilcrease Museum professional staff in consultation with representatives of Muskogean Speaking Tribes that include the Seminole Tribe of Florida (*previously* listed as Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood, & Tampa Reservations)); The Chickasaw Nation; The Choctaw Nation of Oklahoma; The Muscogee (Creek) Nation; and The Seminole Nation of Oklahoma (hereafter referred to as "The Tribes").

History and Description of the Associated Funerary Object

In 1929, one associated funerary object was removed from the Moundville site in Greene County, AL, by William L. Holton, a curator of the Alabama Museum of Natural History, University of Alabama. Holton removed this item from a burial and traded this item with Dr. P.F. Titterington of St. Louis, Missouri in July 1930. Harry J. Lemley, a judge and prominent collector from Arkansas, acquired the item from Titterington between 1930 and 1955. Thomas Gilcrease purchased Harry J. Lemley's entire collection, including this item, in 1955. Thomas Gilcrease

transferred his collection to the City of Tulsa in 1955 and 1963–64, forming the Gilcrease Museum. The associated funerary object is a stone palette (catalog number 61.1872).

This item and the site from which it was removed are culturally affiliated to the Muskogean Speaking Tribes that include the Seminole Tribe of Florida, The Choctaw Nation of Oklahoma, The Chickasaw Nation, The Muscogee (Creek) Nation, and The Seminole Nation of Oklahoma. The Tribal communities in and around the site of Moundville have clear connections and continuities with Muskogean Speaking Tribes, as seen in the archeological and anthropological records, and in oral traditions.

Consultation

A detailed assessment of the associated funerary objects was made by the University of Nebraska State Museum professional staff in consultation with representatives of the Omaha Tribe of Nebraska.

History and Description of the Associated Funerary Objects

In December of 1998, a box containing 23 objects was discovered on the campus of the University of Nebraska-Lincoln. Nine of the objects were labeled “25DK2A.” UNSM determined that these items were funerary objects associated with the human remains and other associated funerary objects removed in 1939 from site 25DK2A, a historic cemetery dating to A.D. 1780–1820, in Dakota County, NE, during excavations conducted under the direction of Stanley Bartos, Jr. All the human remains and associated funerary objects under the control of UNSM that are clearly from site 25DK2A have been repatriated to the Omaha Tribe of Nebraska.

In 2017, the box containing the other 14 objects was discovered at UNSM. Consultations conducted in 2017 and 2022 with representatives of the Omaha Tribe of Nebraska resulted in the determination that these 14 items are funerary objects that either are associated with the human remains and other associated funerary objects from site 25DK2A or are associated with the human remains and other associated funerary objects removed in 1940 from site 25DK10, a historic cemetery dating to A.D. 1780–1820, in Dakota County, NE, during excavations conducted under the direction of John Champe. All the human remains and associated funerary objects under the control of UNSM that are clearly from site 25DK10 have been repatriated to the Omaha Tribe of Nebraska. The 14 associated funerary objects are three lots of black glass beads, one lot of turquoise-blue glass beads, one lot of red wire-wrapped glass beads, four lots of mixed-color glass beads, one lot of white glass beads, one lot of black and white glass beads, one bone core of a bear claw, one bison bone rattle, and one brass crucifix pendant.

In May of 2017, one pottery sherd was discovered in the UNSM collections in

an envelope labelled “Nov. 3, ’40 Stanton, Nebr. Emil Entenmann’s cornfield in fallow on the hill. Central ridge on way to cemetery near bead location found sherd.” Consultations conducted in 2017 and 2022 with representatives of the Omaha Tribe of Nebraska resulted in the determination that this item is a funerary object that is associated with the human remains and other associated funerary objects removed in 1940 from site 25ST0, a Native American burial from the historic period discovered in Emil Entenmann’s cornfield. All the human remains and associated funerary objects under the control of UNSM that are clearly from site 25ST0 have been repatriated to the Omaha Tribe of Nebraska. The associated funerary object is a small gray body sherd decorated with four parallel, incised lines.
