POSTAL SERVICE

Privacy Act; System of Records

AGENCY: Postal Service®

ACTION: Notice of a modified system of records.

SUMMARY: The United States Postal Service® (Postal Service) is proposing to modify one General Privacy Act System of Records (SOR) to support an initiative sponsored by its Transportation Strategy group to procure a software tool that will be used to manage bid solicitation and contract management activities more effectively, by aligning tactical buying decisions with overall sourcing strategies. This initiative also aligns with the network modernization objective within the USPS Delivering for America 10-year plan.

DATES: These revisions will become effective without further notice on August 24, 2022, unless, responses to comments received on or before that date, result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (privacy@usps.gov). To facilitate public inspection, arrangements to view copies of any written comments received will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202-268-3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision,

change, or addition, or when the agency establishes a new system of records. The Postal Service is proposing revisions to an existing system of records (SOR) to support the implementation of a software solution that will provide enhanced functionality and be used to more effectively manage bid solicitation and contract management activities to meet USPS transportation needs.

I. Background

The Postal Service is proposing modifications to SOR 500.100 Carrier and Vehicle Operator Records, to support an initiative to replace existing information systems that have reached the end of their useful life, with a more effective solution that will be used for fulfilling transportation contracting management needs. USPS is implementing a Commercial off-the-shelf (COTS) Bid Solicitation and Contract Management System (CMS) that will align tactical buying decisions with overall sourcing strategies. The USPS Transportation group encompasses Transportation Services, Air, Contract Delivery Service (CDS), Processing Network Transportation (PNT), and Local Distribution Transportation (LDT) with management and oversight of over 12,000 contracts.

Each year thousands of transportation contracts reach the end of their contract term period of performance and require analysis, procurement and negotiation of new agreements. In addition, the Postal Service must respond to unexpected events and emergencies related to seasonal changes, weather emergencies and global crises requiring urgency and flexibility to solicit contracts for reactionary services in a timely manner. The implementation of the COTS solution comprehensively creates, generates and releases solicitations, produces and manages contract requests, and provides approval and tracking capabilities for all transportation organizational stakeholders' groups. The solution will be supported by a combined cloud-based architecture system, that includes a secure, stable, reliable, and scalable application, with a user interface platform for internal and external stakeholders.

The new solution for Bid Solicitation and Contract Management is expected to meet the changing needs of the USPS' transportation needs to improve usability, increase accuracy, and reduce redundant activities. A logistics gateway and user interface will be established for existing suppliers, that will also facilitate participation of new bidders to provide service for USPS.
