

Block Grant-Disaster Recovery grants (CDBG-DR). This research is expected to help the Federal government, states, and communities throughout the United States improve disaster recovery effectiveness for renter households by providing information about how disaster recovery programs funded through CDBG-DR have different impacts on renters and homeowners, and how disasters impact affordable rental housing stock over time. This research will be used to assess renter outcomes, barriers to accessing recovery resources, and mechanisms of Federal and local implementation of CDBG-DR grants. Results from this study will support HUD in identifying

opportunities for changes to legislation, policy and program implementation in disaster recovery to improve outcomes for renters.

This **Federal Register** Notice provides an opportunity to comment on the information collection for this study titled HUD CDBG Disaster Recovery Outcomes of Renter Households. The information collection is designed to support the study of disaster outcomes on renters, including to better understand CDBG-DR allocations across housing tenure, specifically for renters, identify successful processes with corresponding outcomes for rental housing recovery aid programs and translate this research into actionable

programmatic recommendations with appropriate timelines, policy making and implementation changes to improve these outcomes. The study includes a survey, interviews and focus groups in communities that have received CDBG-DR funding.

Respondents: CDBG-DR grantee representatives and administrators; elected and appointed government officials in CDBG-DR grantee jurisdictions and municipalities; landlords and developers in CDBG-DR grantee jurisdictions; representatives from housing and tenant advocacy organizations; and renters living in CDBG-DR grantee jurisdictions.
