

Alternative actions analyzed in the FEIS include:

- Federal Approval—OCRM can issue an approval based on a finding that the ICMP meets all requirements of the CZMA and other federal statutes (the preferred alternative).

- “No action”—OCRM can take no action or deny approval based on a finding that the ICMP does not meet all requirements of the CZMA and/or other federal statutes.

- Delay Federal Approval—OCRM could delay approval if any element of the ICMP necessary for program approval is not satisfied and require that the ICMP be modified.

The FEIS analyzes environmental impacts that may result from implementation of the preferred and alternative actions.

SUPPLEMENTARY INFORMATION: The Standing and Special Reef Fish SSC will review updated catch data and other updated information on the red snapper fishery provided by the Southeast Fisheries Science Center, and will recommend a level of acceptable biological catch beginning in 2012. The SSC will also review an update stock assessment on gray triggerfish and will recommend a level of acceptable biological catch for that stock. In addition, the SSC will be asked for volunteers from within its membership to participate in the SEDAR 31 red snapper benchmark assessment scheduled to begin in the summer of 2012. The SSC will also discuss the formation of a sub-group to suggest recommendations for revisions to the ABC control rule that was developed in the Generic Annual Catch Limits/Accountability Measures Amendment. Finally, the SSC will conduct an additional review of analysis by the National Marine Fisheries Service on the effect of minimum size limits on greater amberjack yield-per-recruit and spawning potential ratio. The SSC had previously reviewed this analysis in October, but had not received all of the documentation.
