SUPPLEMENTARY INFORMATION:

Background

On May 12, 2021, the President issued Executive Order 14028, "Improving the Nation's Cybersecurity."¹ An initial step towards the Executive Order's goal of "enhancing software supply chain security" is transparency. As the Order itself notes, "the trust we place in our digital infrastructure should be proportional to how trustworthy and transparent that infrastructure is, and to the consequences we will incur if that trust is misplaced." An SBOM advances transparency in the software supply chain, similar to a "list of ingredients." NTIA is directed to publish a list of "minimum elements for an SBOM."

NTIA has played a leadership role in advocating for SBOM, convening experts from across the software world and leading discussions around the ideas of software supply chain transparency.² The goal of this Request for Comments is to seek input and feedback on NTIA's approach to developing and publishing the minimum elements of an SBOM. NTIA is committed to being open to further additions, corrections, deletions, or other changes, particularly when suggestions are well supported with
