SUPPLEMENTARY INFORMATION:

I. Background

Persons performing tasks and certain required examinations at coal mines which are related to miner safety and health, and which required specialized experience, are required to be either "certified" or "qualified". The regulations recognize State certification and qualification programs. However, where State programs are not available, under the Mine Act and MSHA standards, the Secretary may certify and qualify persons for as long as they continue to satisfy the requirements needed to obtain the certification or qualification, fulfill any applicable retraining requirements, and remain employed at the same mine or by the same independent contractor.

Applications for Secretarial certification must be submitted to the MSHA Qualification and Certification Unit in Denver, Colorado. MSHA Form 5000-1 provides the coal mining industry with a standardized reporting format that expedites the certification process while ensuring compliance with the regulations. The information provided on the forms enables the Secretary of Labor's delegate—MSHA, Qualification and Certification Unit—to determine if the applicants satisfy the requirements to obtain the certification or qualification. Persons must meet certain minimum experience requirements depending on the type of certification or qualification applied for.

II. Desired Focus of Comments

MSHA is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
