

and any changes, or additions to these Provisions, are specified at 40 CFR part 60, subpart Da. Owners or operators of the affected facilities must submit a one-time only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum. This information is being collected to assure compliance with 40 CFR part 60, subpart Da.

*Form Numbers:* None.

*Respondents/affected entities:* Owners or operators of electric utility steam generating units.

*Respondent's obligation to respond:* Mandatory (40 CFR part 60, subpart Da).

*Estimated number of respondents:* 732 (total).

*Frequency of response:* Semiannually, quarterly.

*Total estimated burden:* 171,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$31,000,000 (per year), which includes \$11,000,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is a decrease in burden from the currently approved ICR due to a slight decrease in the number of respondents. Based on consultations with agency experts, we expect no new coal-fired boilers under subpart Da and the discontinued use of some existing coal-fired units within the industry, thus reducing the number of respondents required to conduct recordkeeping and reporting. This results in a reduction in labor burden and eliminates costs associated with initial notifications and capital/startup costs.

*Abstract:* Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the applicable specific standards. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by the EPA to determine compliance with these standards.

*Form Numbers:* None.

*Respondents/affected entities:* Facilities with a vegetable oil production process.

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart GGGG).

*Estimated number of respondents:* 92 (total).

*Frequency of response:* Initially, occasionally, and annually.

*Total estimated burden:* 34,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$4,090,000 (per year), which includes \$0 in annualized capital/startup and operation & maintenance costs.

*Changes in the Estimates:* There is an increase in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. There is an increase in the number of respondents subject to the rule since the publication of the final rule in 2020. This increase is due to an assumption of a continued growth rate of one new respondent per year in the industry.
