

Department of Transportation's Pipeline and Hazardous Material Safety Administration (PHMSA), formerly the Office of Pipeline Safety, pipeline companies had to determine critical facilities in accordance with guidance provided in that circular by December 31, 2003. Therefore, very little additional burden will be incurred by the pipeline companies in determining or producing this information. Consequently, the burden to pipeline owners/operators from to which information is requested lies only in compiling, reviewing, and transmitting the currently existing information to TSA. The time estimate breakdown is as follows: TSA will request the information from the nation's top 125 pipeline systems. TSA estimates that system owners and operators would spend a maximum of four hours per system to collect, review, and submit the information via email to TSA. Thus, TSA estimates the total annual burden to the public would be (125 owners or operators) $\times$ (4 hours per owner or operator) = 500 total hours per year.

Use and Handling of Results

TSA will use annual product throughput values as a significant factor in determining the most critical systems. The lists of a system's critical facilities and amplifying information are determined by the individual pipeline system owners or operators for their respective systems through their own site assessment process, and will be used by TSA to develop a plan for TSA to inspect the top 100 sites as required in section in 1557(b) of the Implementing Recommendation for the 911 Commission Act of 2007.

Both the request for information sent by TSA and the responses from subject pipeline system owners or operators will be conducted via electronic mail. To the extent that the information provided by owners or operators is Sensitive Security Information (SSI), it will be protected in accordance with procedures meeting the transmission, handling and storage requirements of SSI set forth in 49 CFR parts 15 and 1520.

Issued in Arlington, Virginia, on April 9, 2008.
