

10. WCS shall obtain NRC's approval prior to changing any activities associated with the above Conditions.

11. The Director of the Office of Nuclear Material Safety and Safeguards (or designee), may, in writing, relax or rescind any of the above conditions upon demonstration by WCS of good cause.

III. Conclusion

Based on the staff's evaluation, the NRC has determined, pursuant to 10 CFR 70.17(a), that the exemption as described above at the WCS facility is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest. Accordingly, by this Order, the NRC hereby grants this exemption subject to the conditions in this Order, which implements concentration-based limits for SNM quantities not sufficient to form a critical mass at specific locations at the WCS facility. This NRC Order is effective and final 20 days after issuance of the Order without further order or proceedings. This NRC's Order enables the State of Texas to regulate SNM materials at the WCS facility under the State's radiation protection program as long as WCS complies with this Order.

Pursuant to the requirements in 10 CFR part 51, the Commission has published an Environmental Assessment for the proposed action wherein it has determined that the granting of this exemption will have no significant impacts on the quality of the human environment. That finding was noticed in the **Federal Register** on November 6, 2014 (79 FR 65999).

Dated at Rockville, Maryland, this 3rd day December 2014.

For the Nuclear Regulatory Commission.
Catherine Haney,
Director, Office of Nuclear Material Safety and Safeguards.
