**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), federal agencies must obtain approval from OMB for each collection of information that they conduct or sponsor.

"Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. The OCC requests that OMB extend its approval of the following collection.

*Title:* Market Risk.

*OMB Control No.:* 1557-0247.

*Description:* The Office of the Comptroller of the Currency's (OCC) market risk capital rules (12 CFR part 3, subpart F) apply to national banks and federal savings associations with significant exposure to market risk, which include those national banks and federal savings associations with aggregate trading assets and trading liabilities (as reported in the national bank's or federal savings association's most recent Call Report) equal to 10 percent or more of quarter-end total assets or \$1 billion or more. The rules capture positions for which the market risk capital rules are appropriate; reduce procyclicality in market risk capital requirements; enhance the risk sensitivity of the OCC's capital requirements by measuring risks that are not adequately captured under the requirements for credit risk; and increase transparency through enhanced disclosures.

The information collection requirements are located at 12 CFR 3.203 through 3.212. The rules enhance risk sensitivity and include requirements for the public disclosure of certain qualitative and quantitative information about the market risk of national banks and federal savings associations. The collection of information is necessary to ensure capital adequacy appropriate for the level of market risk.

Section 3.203 sets forth the requirements for applying the market risk framework. Section 3.203(a)(1) requires national banks and federal savings associations to have clearly defined policies and procedures for determining which trading assets and

trading liabilities are trading positions and specifies the factors a national bank or federal savings association must take into account in drafting those policies and procedures. Section 3.203(a)(2) requires national banks and federal savings associations to have clearly defined trading and hedging strategies for trading positions that are approved by senior management and specifies what those strategies must articulate. Section 3.203(b)(1) requires national banks and federal savings associations to have clearly defined policies and procedures for actively managing all covered positions and specifies the minimum requirements for those policies and procedures. Sections 3.203(c)(4) through 3.203(c)(10) require the review, at least annually, of internal models and specify certain requirements for those models. Section 3.203(d)(4) requires the internal audit group of a national bank or federal savings association to report, at least annually, to the board of directors on the effectiveness of controls supporting the market risk measurement systems.

Section 3.204(b) requires national banks and federal savings associations to conduct quarterly backtesting. Section 3.205(a)(5) requires institutions to demonstrate to the OCC the appropriateness of proxies used to capture risks within value-at-risk models. Section 3.205(c) requires institutions to develop, retain, and make available to the OCC value-at-risk and profit and loss information on sub-portfolios for two years. Section 3.206(b)(3) requires national banks and federal savings associations to have policies and procedures that describe how they determine the period of significant financial stress used to calculate the institution's stressed value-at-risk models and to obtain prior OCC approval for any material changes to these policies and procedures.

Section 3.207(b)(1) details requirements applicable to a national bank or federal savings association when the national bank or federal savings association uses internal models to measure the specific risk of certain covered positions. Section 3.208 requires national banks and federal savings associations to obtain prior written OCC approval for incremental risk modeling. Section 3.209(a) requires prior OCC approval for the use of a comprehensive risk measure. Section 3.209(c)(2) requires national banks and federal savings associations to retain and report the results of supervisory stress testing. Section 3.210(f)(2)(i) requires national banks and federal savings associations to document an internal analysis of the risk

characteristics of each securitization position in order to demonstrate an understanding of the position. Section 3.212 requires quarterly quantitative disclosures, annual qualitative disclosures, and a formal disclosure policy approved by the board of directors that addresses the approach for determining the market risk disclosures it makes.

*Type of Review:* Extension of a currently approved collection. *Affected Public:* Individuals; Businesses or other for-profit.

*Number of Respondents:* 12.

*Estimated Burden per Respondent:* 1,964 hours.

*Total Estimated Annual Burden:* 23,568 hours.
