

Officer, Room 14NWH04, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call Samantha Miller, the HRSA Information Collection Clearance Officer, at (301) 443-3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: The National Health Service Corps and Nurse Corps Interest Capture Form OMB No. 0915-0337—Revision.

Abstract: HRSA's National Health Service Corps (NHSC) and the Nurse Corps Scholarship and Loan Repayment Programs are committed to improving the health of the nation's underserved by uniting communities in need with caring health professionals and by supporting communities' efforts to build better systems of care. The NHSC and Nurse Corps Interest Capture Form, which can be accessed on the HRSA website at <https://bhwh.hrsa.gov/about-us/ask-question>, is an optional form that

a health profession student, licensed clinician, faculty member, clinical site administrator, or other interested individual can complete and submit to HRSA online. The purpose of the form is to enable individuals and clinical sites to ask questions about the NHSC and/or Nurse Corps Scholarship and Loan Repayment Programs, and to provide their contact information so that HRSA may provide them with periodic program updates and other general information via email. Completed forms will contain information such as the names and roles of the individual(s), their phone number(s) and email address(es), and the HRSA program(s) in which they are interested or about which they have questions. The revisions in this ICR are as follows:

(a) An increase in the annualized information collection burden due to a higher number of respondents.

(b) The addition of an online version of the NHSC and Nurse Corps Interest Capture Form, located on the HRSA website at <https://bhwh.hrsa.gov/about-us/ask-question>.

Need and Proposed Use of the Information: The need and purpose of this information collection is to share resources and information regarding the

NHSC and Nurse Corps Scholarship and Loan Repayment Programs with interested HRSA website (<https://www.hrsa.gov/>) visitors.

Likely Respondents: Health profession students, licensed clinicians, faculty members, clinical site administrators or other individuals who are interested in learning more or have questions about NHSC and Nurse Corps Scholarship and Loan Repayment Programs.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours *
NHSC and Nurse Corps Interest Capture Form	17,676	1	17,676	0.025	442
Total	17,676	17,676	442

* Total Burden Hours are rounded up to the nearest whole number.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

Bureau of Land Management

[A2407-014-004-065516; #O2412-014-004-047181.1; LLESJ00000]

Right-of-Way Application; Tennessee

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of application.

SUMMARY: The purpose of this notice is to inform the public that the Bureau of Land Management (BLM) has received a right-of-way (ROW) application from East Tennessee Natural Gas, LLC (ETNG) for a natural gas pipeline that is proposed to cross Trousdale, Smith, Jackson, Putnam, Overton, Fentress, Morgan, and Roane counties, Tennessee. The BLM anticipates deciding on the pipeline ROW application after the

publication of this notice, including any associated terms and conditions, if approved.

DATES: On December 30, 2024, the Federal Energy Regulatory Commission (FERC) published a notice of availability in the **Federal Register** (FR 2024-31338) for the Final Environmental Impact Statement (FEIS) regarding the 30-inch natural gas pipeline and appurtenant facilities.

ADDRESSES: The ROW application and maps of the project are available for review at the BLM Southeastern States District Office located at 273 Market Street, Flowood, Mississippi 39232. The FEIS is publicly available to view and download on the FERC eLibrary at the following website https://elibrary.ferc.gov/eLibrary/filelist?accession_num=20241220-3002.

FOR FURTHER INFORMATION CONTACT:

Brian Kennedy, Acting Deputy District Manager, telephone: (601) 919-4697; address: 273 Market Street, Flowood, MS 39232; email: bckennedy@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Kennedy. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: ETNG has applied for a BLM ROW for a 30-inch diameter pipeline and related facilities that involve approximately 5 miles of Federal lands managed by the U.S. Army Corps of Engineers and Tennessee Valley Authority. The total length of the natural gas pipeline is approximately 122.2 miles, of which approximately 111.4 miles of the pipeline would be co-located within existing utility ROW and transmission corridors. For more detailed information regarding the application, maps, and overall project, refer to the **ADDRESSES** section above.

Implementing Executive Order 14153 for Special Areas Within the National Petroleum Reserve-Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Based on identified deficiencies, inconsistency with the President's and the Department's national energy strategy, and pursuant to direction in Executive Order 14153, "Unleashing Alaska's Extraordinary Resource Potential," the Bureau of Land Management (BLM), Alaska State Office, is rescinding the BLM notice entitled "Special Areas Within the National Petroleum Reserve in Alaska," published in the **Federal Register** on July 17, 2024, and the report entitled "Maximizing Protection in the National Petroleum Reserve-Alaska," and the

memorandum with subject header "BLM Interim Management of special areas within the National Petroleum Reserve-Alaska" that were issued on January 16, 2025.

FOR FURTHER INFORMATION CONTACT:

Stephanie Kuhns, Arctic District Manager, at 907-474-2310 or skuhns@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: The National Petroleum Reserve-Alaska (NPR-A) is a 23-million-acre tract managed by the BLM under the authority of the Naval Petroleum Reserves Production Act (NPRPA), 42 U.S.C. 6501 *et seq.*, as amended, the Federal Land Policy and Management Act of 1976, as amended, 43 U.S.C. 1701-1787 (FLPMA), and the Alaska National Interest Lands Conservation Act, 16 U.S.C. 3101-3233 (ANILCA). On May 7, 2024, the BLM issued a final rule, entitled "Management and Protection of the National Petroleum Reserve in Alaska" (89 FR 38712), which became effective on June 6, 2024 (2024 Final Rule).

On July 17, 2024, the BLM published a request for information (RFI) in the **Federal Register** requesting public input on any need to: (1) identify additional significant resource values for existing special areas; (2) modify the boundaries or management of existing special areas; and (3) identify public lands that may qualify for designation as new special areas in the NPR-A. That public comment period closed on September 16, 2024, and on January 16, 2025, the BLM issued both a report entitled, "Maximizing Protection in the National Petroleum Reserve-Alaska," (BLM Report) and a memorandum with the subject header, "BLM Interim Management of Special Areas within the National Petroleum Reserve-Alaska" (Interim Measures Guidance) pursuant to the NPR-A regulations at 43 CFR 2361.30. These documents made determinations regarding adding subsistence as a significant resource value for all special areas and proposed both new and expanded special areas.

Executive Order 14153, "Unleashing Alaska's Extraordinary Resource Potential," (90 FR 8347) directs the BLM to rescind the RFI published in the **Federal Register** on July 17, 2024, and to rescind the Bureau's guidance on the

protection of subsistence resource values in the existing special areas and proposed new and modified special areas in the NPR-A that was issued on January 16, 2025.

On June 3, 2025, the BLM published a notice in the **Federal Register** proposing to rescind the 2024 Final Rule because, in summary, the 2024 Final Rule would hamper the exploration, leasing, and development of oil and gas resources within the NPR-A, contrary to the congressional direction in the NPRPA to develop lands within the NPR-A, including special areas, as part of an expeditious program of oil and gas leasing; the rule is unnecessary to effectively manage surface resources in the NPR-A; and it is inconsistent with the priorities of the Trump administration.

This document notifies the public that the BLM is implementing the direction in Executive Order 14153, "Unleashing Alaska's Extraordinary Resource Potential," (90 FR 8347) to rescind a notice published in the **Federal Register** on July 17, 2024, entitled "Special Areas Within the National Petroleum Reserve in Alaska" (89 FR 58181) that solicited public input on special areas for a period of 60 days.

This notice also serves to announce that the BLM is rescinding the report entitled, "Maximizing Protection in the National Petroleum Reserve-Alaska," and the memorandum entitled, "BLM Interim Management of special areas within the National Petroleum Reserve-Alaska" that were issued on January 16, 2025.

These documents are being rescinded for the following reasons: First, the BLM did not comply with the regulations in developing the report or the interim guidance. The regulations at 43 CFR 2361.30(b)(3) direct the BLM authorized officer to provide the public and interested stakeholders with the opportunity to make recommendations about lands, significant resource values, and protection measures for special areas and to "evaluate and respond to recommendations that are made in completing its evaluation." The BLM received more than 80,000 responses to the request, but the vast majority of those were form letters. However, many of the unique letters submitted in response to the RFI (<https://www.blm.gov/alaska/report/npr-special-area-rfi-unique-responses>) opposed the expansion of special areas and the addition of new significant resource values. This includes letters from small businesses, the Alaska Congressional Delegation, the oil and gas industry and trade groups, Alaska Native Corporations, local governments, and
