**II. Background**

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC recently submitted a proposed collection of information to OMB for review entitled, "Nuclear Energy Innovation and Modernization Act Local Community Advisory Board Questionnaire." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 19, 2019 (84 FR 16547).

1. *The title of the information collection:* Nuclear Energy Innovation and Modernization Act Local Community Advisory Board Questionnaire.
2. *OMB approval number:* An OMB control number has not yet been assigned to this proposed information collection.

3. *Type of submission:* New.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required or requested:* Once.

6. *Who will be required or asked to respond:* Respondents will be the existing local community advisory boards in the vicinity of power reactors undergoing decommissioning, similar established stakeholder groups, or local government organizations.

7. *The estimated number of annual responses:* 15 (7 responses from sites with established local community advisory boards + 8 responses from sites where local community advisory boards have not been established).

8. *The estimated number of annual respondents:* 15 (7 sites with established local community advisory boards + 8 sites where local community advisory boards have not been established).

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 54 hours.

10. *Abstract:* The NRC is planning to coordinate activities in accordance with Section 108 of the Nuclear Energy Innovation and Modernization Act to collect information on the use of local community advisory boards during decommissioning activities and issue a best practices report. In order to ensure appropriate best practices are identified, the NRC has developed a questionnaire that will seek feedback in a number of areas related to the formation and operation of local community advisory boards. The questionnaire will address the following areas: The type of topics that might be brought before a community advisory board; how the board's input could inform the decision-making process for various decommissioning stakeholders; how the board might interact with other State and Federal agencies to promote dialogue between the licensee and impacted stakeholders; and how the board could offer opportunities for public engagement throughout the decommissioning process. The NRC will issue a report to Congress in June 2020 identifying best practices for establishment and operation of local community advisory boards.

Dated at Rockville, Maryland, this 2nd day of July, 2019.

For the Nuclear Regulatory Commission.
