Occupational Safety and Health Administration

[Docket No. NRTL-2-92]

Canadian Standards Association, Applications for Renewal and Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: This notice announces: (1) The application of Canadian Standards Association for renewal of its recognition as a Nationally Recognized Testing Laboratory under 29 CFR 1910.7, and (2) the application of Canadian Standards Association for expansion of its recognition to use additional standards and presents the Agency's preliminary finding. This preliminary finding does not constitute an interim or temporary approval of these applications.

DATES: Comments submitted by interested parties, or any request for extension of the time to comment, must be received no later than April 2, 2001.

ADDRESSES: Submit written comments concerning this notice to: Docket Office, Docket NRTL-2-92, U.S. Department of Labor, Occupational Safety and Health Administration, Room N2625, 200 Constitution Avenue, NW., Washington,

DC 20210; telephone: (202) 693-2350. Commenters may transmit written comments of 10 pages or less in length by facsimile to (202) 693-1648. Submit request for extensions concerning this notice to: Office of Technical Programs and Coordination Activities, NRTL Program, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3653, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Bernard Pasquet, Office of Technical Programs and Coordination Activities, NRTL Program, Room N3653 at the above address, or phone (202) 693-2110.

SUPPLEMENTARY INFORMATION:

Notice of Application

The Occupational Safety and Health Administration (OSHA) hereby gives notice that the Canadian Standards Association (CSA) has applied for renewal and for expansion of its current recognition as a Nationally Recognized Testing Laboratory (NRTL). CSA's expansion request covers the use of additional test standards.

OSHA recognition of an NRTL signifies that the organization has met the legal requirements in § 1910.7 of Title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, OSHA can accept products "properly certified" by the NRTL. OSHA processes applications related to an NRTL's recognition following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish this public notice of the preliminary finding on an application.

The most recent notices published by OSHA for CSA's recognition covered an expansion for additional standards, which OSHA announced on July 20, 1999 (64 FR 38926) and granted on November 4, 1999 (64 FR 60240). The following is a chronology of the other **Federal Register** notices published by OSHA concerning CSA's recognition, all of which involved an expansion of recognition for additional sites, standards, or programs: a request announced on December 10, 1993 (58 FR 64973) and granted on February 4, 1994 (59 FR 5446); a request announced on March 3, 1994 (59 FR 10173) and granted on August 9, 1994 (59 FR 40602); a request announced on December 8, 1994 (59 FR 63383) and granted on March 24, 1995 (60 FR

15595); and a request announced on July 12, 1996 (61 FR 36763) and granted on November 20, 1996 (61 FR 59110). The renewal will incorporate all recognitions granted to CSA through the date of publication of this preliminary finding.

The current address of the CSA testing facilities already recognized by OSHA are:

Canadian Standards Association,
Etobicoke (Toronto), 178 Rexdale
Boulevard, Etobicoke, Ontario, M9W

Gas Association)

CSA International, Irvine, 2805 Barranca
Parkway, Irvine, California 92606
(formerly part of the American Gas
Association)

General Background on the Applicant and Applications

CSA originated in 1919 as the Canadian Engineering Standards Association (CESA), which was changed in 1944 to the present name. In 1940, CSA began to test and certify products. CSA received its recognition as an NRTL on December 24, 1992 (see 57 FR 61452), for a period of five years ending December 24, 1997. Appendix A to 29 CFR 1910.7 stipulates that the period of recognition of an NRTL is five years and that an NRTL may renew its recognition by applying not less than nine months, nor more than one year, before the expiration date of its current recognition. CSA submitted its renewal request on March 20, 1997 (see Exhibit 26A), within the time allotted, and CSA retains its recognition pending OSHA's final decision in this renewal process.

In July 1997, CSA acquired testing facilities that OSHA had recognized for the American Gas Association on June 7, 1990 (55 FR 23312). Although OSHA was generally aware that CSA had made the acquisition, CSA did not officially inform OSHA until March 1999 as to how it wanted to treat these sites within its NRTL operations. The NRTL Program staff had withheld action on CSA's renewal request until it received this information.

CSA has submitted a request, dated June 16, 1999 (see Exhibit 26B), to

expand its recognition as an NRTL to include 195 additional test standards. The NRTL Program staff has determined that 51 of the 195 standards are not "appropriate test standards," within the meaning of 29 CFR 1910.7(c). The staff makes such determinations in processing expansion requests from any NRTL. Therefore, OSHA would approve 144 test standards for the expansion, which are listed below in the section on expansion.

Renewal of NRTL Recognition

CSA seeks renewal of its recognition for the six sites that OSHA has previously recognized. The renewal of each of these sites is limited to performing testing to the test standards for which OSHA has recognized CSA, and for which the site has the proper capability and control programs. The renewal will allow CSA to maintain its current operation as an NRTL.

CSA also seeks renewal of its recognition for testing and certification of products to demonstrate compliance to the following 416 test standards, which OSHA has previously recognized for CSA. All these standards are "appropriate," within the meaning of 29 CFR 1910.7(c). However, some of the test standards for which OSHA currently recognizes CSA were no longer appropriate at the time of preparation of this preliminary notice, primarily because they have been withdrawn by the standards developing organization. As appropriate, OSHA has eliminated or replaced these test standards in the list shown below.

OSHA recognition of any NRTL for a particular test standard is limited to equipment or materials (i.e., products) for which OSHA standards require third party testing and certification before use in the workplace. As a result, the Agency's recognition of an NRTL for a test standard excludes any product(s), falling within the scope of the test standard, for which OSHA has no such requirements.

 - UL 6500 Audio/Visual and Musical Instrument Apparatus for Household, Commercial, and Similar General Use
 - UL 8730-1 Electrical Controls for Household and Similar Use; Part 1: General Requirements
- (1) These standards are approved for equipment or materials intended for use in commercial and industrial power system applications. These standards are not approved for equipment or materials intended for use in installations that are excluded by the provisions of Subpart S in 29 CFR part 1910, in particular § 1910.302(a)(2).
- Note:** Testing and certification of gas operated equipment is limited to equipment for use with “liquefied petroleum gas” (“LPG” or “LP-Gas”).
- Footnote “(1)” has been added for clarification and for consistency with similar standards that are included for the expansion request.
- The designations and titles of the above test standards were current at the time of the preparation of this notice. Many of the Underwriters Laboratories (UL) test standards listed in this notice are approved as American National

Standards by the American National Standards Institute (ANSI). However, for convenience in compiling the lists, we use the designation of the standard developing organization (e.g., UL 22) for the standard, as opposed to the ANSI designation (e.g., ANSI/UL 22). Under our procedures, an NRTL recognized for an ANSI approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of whether it is currently recognized for the proprietary or ANSI version. Contact ANSI or the ANSI web site to find out whether or not a standard is currently ANSI approved.

Programs and Procedures

CSA seeks continued use of the following supplemental programs and procedures, based upon the criteria detailed in the March 9, 1995 **Federal Register** notice (60 FR 12980, 3/9/95). This notice lists nine (9) programs and procedures (collectively, programs), eight of which an NRTL may use to control and audit, but not actually to generate, the data relied upon for product certification. An NRTL's initial recognition will always include the first or basic program, which requires that all product testing and evaluation be performed in-house by the NRTL that will certify the product. OSHA has already recognized CSA for these programs.

Program 2: Acceptance of testing data from independent organizations, other than NRTLs.

Program 3: Acceptance of product evaluations from independent organizations, other than NRTLs.

Program 4: Acceptance of witnessed testing data.

Program 5: Acceptance of testing data from non-independent organizations.

Program 6: Acceptance of evaluation data from non-independent organizations (requiring NRTL review prior to marketing).

Program 7: Acceptance of continued certification following minor modifications by the client.

Program 8: Acceptance of product evaluations from organizations that function as part of the International Electrotechnical Commission Certification Body (IEC-CB) Scheme.

Program 9: Acceptance of services other than testing or evaluation performed by subcontractors or agents.

OSHA developed the program descriptions to limit how an NRTL may perform certain aspects of its work and to permit the activities covered under a program only when the NRTL meets certain criteria. In this sense, they are special conditions that the Agency

places on an NRTL's recognition. OSHA does not consider these programs in determining whether an NRTL meets the requirements for recognition under 29 CFR 1910.7. However, OSHA does treat these programs as one of the three elements that defines an NRTL's scope of recognition.

Expansion of NRTL Recognition

CSA seeks recognition for testing and certification of products to demonstrate compliance with the following 144 test standards, and OSHA has determined the standards are appropriate, as prescribed by 29 CFR 1910.7(c). OSHA recognition of any NRTL for a particular test standard is limited to equipment or materials (i.e., products) for which OSHA standards require third party testing and certification before use in the workplace. As a result, the Agency's recognition of an NRTL for a test standard excludes any product(s), falling within the scope of the test standard, for which OSHA has no such requirements.

- UL 8730-2-9 Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Temperature Sensing Controls
- UL 8730-2-14 Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Electric Actuators

⁽¹⁾ These standards are approved for equipment or materials intended for use in commercial and industrial power system applications. These standards are not approved for equipment or materials intended for use in installations that are excluded by the provisions of Subpart S in 29 CFR part 1910, in particular Section 1910.302(a)(2).

Note: Testing and certification of gas operated equipment is limited to equipment for use with "liquefied petroleum gas" ("LPG" or "LP-Gas").

Preliminary Finding

CSA has submitted acceptable requests for renewal and expansion of its recognition as an NRTL. In processing these requests, OSHA has performed an on-site review (evaluation) of CSA's facilities. CSA has addressed the discrepancies noted by the assessor following the review, and the assessor has included the resolution in the on-site review report (see Exhibit 27).

Following a review of the application file, the on-site review report, and other pertinent information, the NRTL Program staff has concluded that OSHA can grant to CSA: (1) The renewal for the 6 sites and the test standards and programs listed above, and (2) the expansion for the additional 144 test standards. The staff therefore recommended to the Assistant Secretary that the applications be preliminarily approved.

Based upon the recommendation of the staff, the Assistant Secretary has made a preliminary finding that the Canadian Standards Association can meet the requirements as prescribed by

expansion of recognition. This preliminary finding does not constitute an interim or temporary approval of the applications for CSA.

OSHA welcomes public comments, in sufficient detail, as to whether CSA has met the requirements of 29 CFR 1910.7 for the renewal and expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comment should consist of pertinent written documents and exhibits. To consider it, OSHA must receive the comment at the address provided above (see

ADDRESSES), no later than the last date for comments (see **DATES** above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above (also see **ADDRESSES**) no later than the last date for comments (also see **DATES** above). You must include your reason(s) for any request for extension. OSHA will limit an extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of CSA's requests, the on-site review report, and all submitted comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. You should refer to Docket No. NRTL-2-92, the permanent record of public information on CSA's recognition.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant CSA's renewal and expansion requests. The Assistant Secretary will make the final decision on granting the renewal and expansion, and in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Signed at Washington, D.C. this 2d day of March, 2001.

R. Davis Layne,

Acting Assistant Secretary.

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. NRTL-2-93]

Entela, Inc., Application for Renewal of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: This notice announces the application of Entela, Inc., for renewal of its recognition as a Nationally Recognized Testing Laboratory (NRTL) under 29 CFR 1910.7, and presents the Agency's preliminary finding. This preliminary finding does not constitute an interim or temporary approval of this application.

DATES: Comments submitted by interested parties, or any request for extension of the time to comment, must be received no later than April 2, 2001.

ADDRESSES: Submit written comments concerning this notice to: Docket Office, Docket NRTL-2-93, U.S. Department of Labor, Occupational Safety and Health Administration, Room N2625, 200 Constitution Avenue, NW., Washington, DC 20210; telephone: (202) 693-2350. Commenters may transmit written comments of 10 pages or less in length by facsimile to (202) 693-1648. Submit request for extensions concerning this notice to: Office of Technical Programs and Coordination Activities, NRTL Program, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3653, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Bernard Pasquet, Office of Technical Programs and Coordination Activities, NRTL Program, Room N3653 at the above address, or phone (202) 693-2110.

SUPPLEMENTARY INFORMATION:

Notice of Application

The Occupational Safety and Health Administration (OSHA) hereby gives notice that Entela, Inc. (ENT), has applied for renewal of its current recognition as a Nationally Recognized Testing Laboratory (NRTL). ENT requests renewal for its existing scope of recognition.

OSHA recognition of an NRTL signifies that the organization has met the legal requirements in § 1910.7 of Title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products

covered within its scope of recognition, and is not a delegation or grant of government authority. As a result of recognition, OSHA can accept products "properly certified" by the NRTL. OSHA processes applications related to an NRTL's recognition following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish this public notice of the preliminary finding on an application.

The most recent notices published by OSHA for ENT's recognition covered an expansion of recognition for additional test standards, which OSHA announced on November 10, 1998 (63 FR 63084), and granted on March 9, 1999 (64 FR 11501). The following is a chronology of the other **Federal Register** notices published by OSHA concerning Entela's recognition, all of which involved an expansion of recognition for additional sites, standards, or programs: a request announced on February 21, 1997 (62 FR 8041), and granted on May 22, 1997 (62 FR 28066); and a request announced on April 17, 1998 (63 FR 19275), and granted on July 10, 1998 (63 FR 37416). OSHA also published a correction of recognition on July 13, 1999 (64 FR 37815).

The current addresses of the testing facilities (sites) that OSHA recognizes for ENT are:

Entela, Inc., 3033 Madison, S.E., Grand Rapids, Michigan 49548

Entela Taiwan Laboratories, 3F No. 260 262 Wen, Lin North Road, Pei Tou, Taipei, Taiwan.

General Background on the Applicant and the Application

Entela, Inc., was originally founded in 1974 as a Michigan Corporation specializing in structural steel inspection. In 1981, equipment and personnel were added to initiate an in-house materials laboratory. This was followed by a formation of certification programs within Entela, Inc. The original company was founded as Entel Engineering Services.

Entela received its recognition as an NRTL on July 26, 1994 (59 FR 37997), for a period of five years ending July 26, 1999. Appendix A to 29 CFR 1910.7 stipulates that the period of recognition of an NRTL is five years and that an NRTL may renew its recognition by applying not less than nine months, nor more than one year, before the expiration date of its current recognition. Entela submitted a request to renew its recognition on, August 10, 1998 (see Exhibit 15), within the time allotted, and retains its recognition pending OSHA's final decision in this renewal process.
