Needs and Uses: On March 31, 1999, the FCC released a *Report and Order*, Amendment of Parts 2 and 15 of the Commission Rules to Further Ensure That Scanning Receivers Do Not Receive Cellular Radio Signals, ET Docket No. 980-76, FCC 99-58. The FCC rules under 47 CFR 2.1033(b)(10) require manufacturers of scanning receivers to design their equipment so that: It has 38 dB of image rejection for Cellular Service frequencies, tuning, control and filtering circuitry are inaccessible, and any attempt to modify the scanning receiver to receive Cellular Service transmissions will likely render the scanning receiver inoperable. The Commission also requires manufacturers to submit information with any application for certification that describes: The testing method used to determine compliance with the 38 dB image rejection ratio, the design features that prevent modification of the scanning receiver to receive Cellular Service transmissions, and the design steps taken to make tuning, control, and filtering circuitry inaccessible. Furthermore, the FCC requires equipment to carry a statement assessing the vulnerability of the scanning receiver to modification and to have a label affixed to the scanning receiver, similar to the following (47 CFR 15.121):

Warning: Modification of this device to receive cellular radiotelephone service signals is prohibited under FCC Rules and Federal Law.
