

#3045–0170). Information will be collected from a nationally representative sample of AmeriCorps alumni who served in AmeriCorps NCCC, AmeriCorps VISTA, and AmeriCorps State and National programs and completed their most recent term of service 2, 5, or 10 years ago.

Information will be collected from AmeriCorps Alumni through an online survey that will be administered by a contractor on behalf of CNCS. The purpose of the survey is to better understand the long-term civic participation and career pathways of AmeriCorps alumni, the acquisition of hard and soft career skills obtained through national service, and the utilization of the Education Award and its effect on future post-secondary outcomes and career choices. These data may also be matched to administrative data collected by the US Census for the Longitudinal Employment and Household Data Set and by the National Student Clearinghouse in order to assess both employment and education outcomes within the national population. In addition, the agency is interested in exploring how member outcomes vary by life stage and by different types of service experiences. This survey is also an opportunity to determine the value of data collected from alumni who are at different stages following their service year for informing policy and program decisions. CNCS also seeks to continue using the current clearance until the revised survey is approved by OMB. The current clearance is due to expire on 4/30/18.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal

agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on regulations.gov.

POLICY JUSTIFICATION

Oman—F-16 Operational Flight Profile and Identification Friend or Foe Mode 5 Upgrade

The Government of Oman has requested a possible sale of items and services to support an incremental Operational Flight Profile (OFP) software upgrade for F-16 subsystems, as well as Identification Friend or Foe (IFF) and secure communications equipment for Mode 5 operations on twenty-three (23) F-16 aircraft. Non-MDE items and services consist of twenty-nine (29) KIV-78 cryptographic/timing modules (twenty-three (23) installed and six (6) spares); twenty-nine (29) KY-100M cryptographic radio encryptors (twenty-three (23) installed and six (6) spares); twenty-nine (29) AN/APX-126 Combined Interrogator Transponders (twenty-three (23) installed and six (6) spares); Classified and Unclassified Computer Program Identification Numbers (CPINS) upgrades; OFP upgrades for IFF Mode 5 capable systems, Joint Mission Planning (JMPS) upgrade; Sniper Advanced Targeting Pod software, service support, support equipment, spares, and training; systems support and test equipment; spare and repair parts; publications and technical documentation; training and training equipment; U.S. Government and contractor engineering; logistics and technical support services; and other related elements of logistics and program support. The estimated cost is \$62 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic progress in the Middle East.

The proposed sale allows the U.S. military to support the Royal Air Force of Oman, further strengthen the U.S.-Omani military-to-military relationship, and ensure continued interoperability of forces and opportunities for bilateral training and exercises with Oman's military forces.

This proposed sale of items and services will enable Oman's twenty-three (23) F-16s currently using Mode 4 IFF to become interoperable on Mode 4/5. Mode 5 IFF allows U.S. and partner airborne and surface armed forces to conduct complimentary air operations. Incremental OFP software upgrades required to support Mode 5 will provide additional incremental improvement for other associated F-16 subsystems. Oman will have no difficulty in

absorbing these upgrades into its F-16 fleet.

This proposed sale of equipment and support will not alter the basic military balance in the region.

The prime contractor will be Lockheed Martin of Fort Worth, Texas. There are no known offset agreements proposed in conjunction with this potential sale.

The proposed sale will not require the long-term assignment of any additional U.S. Government or contractor representatives to Oman.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17-50

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. This proposed sale of items and services to upgrade Oman's F-16 aircraft will involve the release of sensitive technology related to the Identification Friend or Foe (IFF) and secure communications equipment.

2. The AN/APX-126 Combined Interrogator Transponder is an IFF dual Mode 4 and 5 capable system. It is UNCLASSIFIED unless/until Mode 4 and/or Mode 5 operational evaluator parameters are loaded into the equipment, which are classified up to SECRET. Classified elements of the IFF system include software object code, operating characteristics, parameters, and technical data. Mode 4 and Mode 5 anti-jam performance specifications/data, software source code, algorithms, and tempest plans or reports will not be offered, released, discussed, or demonstrated.

3. KIV-78 is a crypto appliqué for Mode 5 IFF. The hardware is UNCLASSIFIED unless loaded with Mode 4 and/or Mode 5 classified elements, which are classified up to SECRET.

4. KY-100M is a cryptographic encryptor for voice radios to provide secure communication capabilities. The hardware is UNCLASSIFIED unless loaded with cryptograph keys, which are classified up to SECRET.

5. Joint Mission Planning System (JMPS) is a multi-platform, PC-based mission planning system. JMPS hardware is UNCLASSIFIED, but the software is classified up to SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used

to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Oman can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

8. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Oman.
