

1.21001(b) and 54.1014(a) of the Commission's rules from each applicant seeking to participate in a 5G Fund auction, and will use the information, disclosures, and certifications to determine whether an applicant is legally, technically, and financially qualified to participate in a 5G Fund auction. To aid in collecting this information, the Commission has created FCC Form 184, which will be used to provide the information, disclosures, and certifications required by sections 1.21001(b) and 54.1014(a). Commission staff will review the information, disclosures, and certifications collected on FCC Form 184 as part of the pre-auction process, prior to the start of the auction, and determine whether each applicant satisfies the Commission's requirements to participate in an auction for 5G Fund support. Without the information collected on FCC Form 184, the Commission will not be able to determine if an applicant is legally qualified to participate in a 5G Fund auction and has complied with the various applicable regulatory and statutory auction requirements for such participation. This approach provides an appropriate screen to ensure serious participation without being unduly burdensome.
