Title: Section 76.934(e), Petitions for Extension of Time.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; State, local or tribal government.

Number of Respondents: 20.

Estimated Time per Response: 4 hours.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 80 hours.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: No need for confidentiality required.

Needs and Uses: 47 CFR 76.934(e) states that small cable systems may obtain an extension of time to establish compliance with rate regulations provided that they can demonstrate that timely compliance would result in severe economic hardship. Requests for the extension of time should be addressed to the local franchising authorities ("LFAs") concerning rates for basic service tiers and the Commission concerning rates for a cable programming service tier (CPST) and associated equipment. The filing of a request for an extension of time to comply with the rate regulations will not toll the effective date of rate regulation for small systems or alter refund liability for rates that exceed permitted levels after May 15, 1994.

Since the Commission no longer regulates the CPST, it no longer receives extension requests.

OMB Control Number: 3060-0688.

Title: Abbreviated Cost-of-Service Filing for Cable Network Upgrades.

Needs and Uses: FCC Form 1235 is an abbreviated cost-of-service filing for significant network upgrades that allows cable operators to justify rate increases related to capital expenditures used to improve rate-regulated cable services. FCC Form 1235 is filed following the end of the month in which upgraded cable services become available and are providing benefits to subscribers. In addition, FCC Form 1235 can be filed for pre-approval any time prior to the upgrade services becoming available to subscribers using projected upgrade costs. If the pre-approval option is exercised, the operator must file the form again following the end of the month in which upgraded cable services become available and are providing benefits to customers of regulated

services, using actual costs where applicable.

On October 2000, the Federal Communications Commission adopted and released several rulemakings to foster competition in local communications markets by implementing measures to ensure that competing telecommunications providers are able to provide services to customers in multiple tenant environments ("MTEs").

Specifically, the rulemakings require the following: (1) Prohibited carriers from entering into contracts that restrict or effectively restrict a property owner's ability to permit entry by competing carriers; (2) established procedures to facilitate moving the demarcation point to the minimum point of entry ("MPOE") at the building owner's request, and requires incumbent local exchange carriers ("LECs") to timely disclose the location of existing demarcation points where they are not located at the MPOE; (3) determined that, under Section 224 of the Communications Act, utilities, including LECs, must afford telecommunications carriers and cable service providers reasonable and nondiscriminatory access to conduits and right-of-way located in customer buildings and campuses, to the extent such conduits and rights-of-way are owned or controlled by the utility; and (4) extended to antennas that receive and transmit telecommunications and other fixed wireless signals the existing prohibition of restrictions that impair the installation, maintenance or use of certain video antennas on property within the exclusive use or control of the antenna user, where the user has a direct or indirect ownership or leasehold interest in the property.
