Background

The data for the Transportation of Hazardous Materials, Highway Routing ICR is collected under authority of 49 U.S.C. 5112 and 5125. Specifically, 49 U.S.C. 5112(c) requires that the Secretary, in coordination with the States, “shall update and publish periodically a list of currently effective hazardous material highway route designations.”

Under 49 CFR 397.73, the FMCSA Administrator has the authority to request that each State and Indian tribe, through its routing agency, provide information identifying hazardous materials routing designations within its

jurisdiction. That information is collected and consolidated by FMCSA and published annually, in whole or as updates, in the **Federal Register**.

Comments From the Public: The FMCSA received 1 comment in response to the 60-day comment request **Federal Register** notice published on October 23, 2013. FMCSA will consider the comment received from the American Trucking Association (ATA) that addressed the changes to be implemented in the ICR to meet the requirements of Public Law 112-141, Moving Ahead for Progress in the 21st Century Act (MAP-21).

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FMCSA to perform its functions; (2) the accuracy of the estimated burden; (3) ways for the FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.
