Total Annual Burden (Hours):	505

Source: FDIC.

Note: The annual burden estimate for a given collection is calculated in two steps. First, the total number of annual responses is calculated as the whole number closest to the product of the annual number of respondents and the annual number of responses per respondent. Then, the total number of annual responses is multiplied by the time per response and rounded to the nearest hour to obtain the estimated annual burden for that collection. This rounding ensures the annual burden hours in the table are consistent with the values recorded in the OMB’s regulatory tracking system.

General Description of Collection: The regulations at part 349 subpart A impose reporting and recordkeeping requirements, as defined by the PRA, on any FDIC-insured state-chartered bank that is not a member of the Federal Reserve System or FDIC-insured state-chartered savings association that is registered as a swap entity (covered swap entity). As such, the FDIC must periodically obtain approval from the Office of Management and Budget (OMB) for these collections of information (ICs) with respect to covered swap entities. The OMB approves these ICs through OMB No. 3064–0204, and last approved the ICR on September 8, 2020 (2020 ICR). OMB No. 3064–0204 is set to expire on September 30, 2023. The 2020 ICR contained eleven ICs comprising 1,261 estimated annual responses for an estimated annual burden of 1,740 hours.

There is no change in the substance or methodology of this information collection. The change in burden is due to the decline in estimated burden hours from 1,760 to 505 hours. The decline in estimated hours is driven primarily from a reduction in the number of ICs relative to the 2020 ICR. The ICs from the 2020 ICR that were not included in this renewal had an estimated 1,253 annual responses and an estimated 1,295 annual burden hours.

Request for Comment

Comments are invited on: (a) whether the collections of information are necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
