

allocations, and accountability measures; ending overfishing of gag; managing gag and red grouper commercial and recreational harvests consistent with TAC; reducing grouper discard mortality; establishing seasonal-area closures; and requiring compliance with Federal fishery management regulations by federally permitted reef fish vessels when fishing in state waters. Based on further analysis of the environmental impacts of actions proposed in Amendment 30B, NMFS and the Council did not anticipate any significant impacts on the human environment and published a notice on March 7, 2008 (73 FR 12393) announcing an EA would be the appropriate NEPA document. Subsequent to this evaluation, the Council wished to examine a more extensive seasonal area closure to protect spawning aggregations of gag and other reef fish species. As a result of this and other changes, NMFS and the Council determined actions in Amendment 30B could be significant to the human environment and determined an EIS was required to further evaluate the impacts of Amendment 30B.

**SUPPLEMENTARY INFORMATION:** On June 6, 2008, notice was published in the **Federal Register** (73 FR 32307) that an amendment of Permit No. 716-1705-00 had been requested by the above-named individual. The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The amendment authorizes Dr. Sharpe to use a mini-helicopter to film lunge feeding humpback whales (*Megaptera novaeangliae*) in Southeast Alaska in July and August, 2008.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a supplemental environmental assessment was prepared analyzing the effects of the permitted activities. After a Finding of No Significant Impact, the determination was made that it was not necessary to prepare an environmental impact statement.

Issuance of this permit, as required by the ESA, was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 7, 2008.
