

emissions, the average effects were not zero. If we determine the effect of Vektron® 6913 on NO_x emissions, should we determine that Vektron® 6913 increases HC and CO emissions by the average amount found by the test program, or should we assume that the HC and CO effects are zero because the emission increases were not statistically significant?

IV. Conclusion

EPA will carefully consider all comments received. We will evaluate these comments and other information or analyses which may become available, including perhaps conducting additional analyses of our own in arriving at our conclusion as to the emission benefits of Vektron® 6913 as proposed for fuel additive use by Infineum. This conclusion will be publically available via our web site. If that conclusion indicates significant emission benefits could be derived from the use of this fuel additive, we will also prepare appropriate protocols for determining the extent of actual in-use on-highway fleet emissions benefits.

Dated: March 7, 2001.

Robert Brenner,

Acting Assistant Administrator, Office of Air and Radiation.
