

(Tipton County), Indiana, about 50 miles north of Indianapolis. The plant, currently under construction, will be used to produce dual-clutch transmissions for automobiles and light trucks (up to 700,000 units annually) for export and the domestic market. The manufacturing process at the facility involves machining, assembly, welding, and testing using domestic and foreign-origin inputs. Components that would be purchased from abroad (representing about 52% of total, by value) to be used in manufacturing include: bearings, differentials, gear sets, clutch assemblies and supports, electric control modules, oil pumps and gears, solenoids, fasteners, lever assemblies, rod assemblies, pawls, retainers, springs, retainers, bushings, articles of plastics, seals, gear oil, grease, and adhesives (duty rate range: free 5.8%, 84¢/bbl.).

FTZ procedures would exempt GETRAG from customs duty payments on the foreign components used in export transmission production. On domestic shipments transferred in-bond to U.S. automobile assembly plants with subzone status, no duties would be paid on the foreign transmission components used in automobile and light truck production until the finished motor vehicles are entered for consumption, at which time the finished automobile duty rate (2.5%) could be applied to the foreign-origin components noted above. For the transmissions withdrawn directly by GETRAG for customs entry, the finished transmission rate (2.5%) could be applied to the foreign inputs. Customs duties also could possibly be deferred or reduced on foreign status production equipment. The application indicates that the savings from FTZ procedures would help improve the facility's international competitiveness. In accordance with the Board's regulations, Pierre Duy of the FTZ Staff is designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is October 17, 2008. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to November 3, 2008.

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations: U.S. Department of Commerce Export Assistance Center, Suite 106, 11405 N. Pennsylvania Street, Carmel, Indiana 46032; and, Office of the Executive Secretary, Foreign-Trade

Zones Board, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW, Washington, DC 20230-0002. For further information, contact Pierre Duy at pierre\_duy@ita.doc.gov, or (202) 482-1378.

Dated: August 8, 2008.

#### Notice of Decision on Application for Duty-Free Entry of Scientific Instruments

This is a decision pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, as amended by Pub. L. 106-36; 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 2104, U.S. Department of Commerce, 14th and Constitution Ave, NW, Washington, D.C.

Comments: None received. Decision: Approved. We know of no instruments of equivalent scientific value to the foreign instrument described below, for such purposes as the instrument is intended to be used, that was being manufactured in the United States at the time of its order.

Docket Number: 08-018. Applicant: Washington University, St. Louis, MO 63130. Instrument: Modular Hot Cell - COMECER Model MIP1-1P-1350. Manufacturer: COMECER, Italy. Intended Use: See notice at 73 FR 30377, May 27, 2008. Reasons: The instrument has a sealed system for isotope work which is separated from the shielded door, which allows for the opening of the door for training purposes without compromising the work area air quality. The separate shield and door design also insures that the door is not contaminated, and thus, the user can open the door to survey the hot cell for radioactivity without the risk of contamination to the user and trainees. This safety feature is specific to this instrument and not available from other U.S. manufacturers.

Dated: August 12, 2008.

#### Electrolytic Manganese Dioxide From the People's Republic of China: Final Determination of Sales at Less Than Fair Value

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**EFFECTIVE DATE:** August 18, 2008.

**SUMMARY:** On March 26, 2008, the Department of Commerce (the "Department") published its preliminary determination of sales at less than fair value ("LTFV") in the antidumping ("AD") investigation of electrolytic manganese dioxide ("EMD") from the People's Republic of China ("PRC"). The period of investigation ("POI") is January 1, 2007, through June 30, 2007. We invited interested parties to comment on our preliminary determination of sales at LTFV. Based on our analysis of the comments we received, we have made changes to our calculations for the mandatory respondent. We determine that EMD from the PRC is being, or is likely to be, sold in the United States at LTFV as provided in section 735 of the Tariff Act of 1930, as amended ("the Act"). The estimated margins of sales at LTFV are shown in the "Final Determination Margins" section of this notice.

**FOR FURTHER INFORMATION CONTACT:** Eugene Degnan or Robert Bolling, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-0414 or (202) 482-3434, respectively.
