SUPPLEMENTARY INFORMATION: The BLM Farmington Field Office, Farmington, New Mexico, intends to prepare an RMP amendment and associated EA to address the visual resource management in the planning area. The planning area is located in San Juan, Rio Arriba, and Sandoval Counties, New Mexico, and encompasses 1.4 million acres of public land in these counties. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the planning process. The RMP completed in 2003 directs the Field Office to conduct a review of VRM objectives upon the completion of a new visual resource inventory. That inventory was completed in March of 2009. The purpose of this RMP amendment/EA is to address the need to update the VRM objectives in the 2003 RMP.

The BLM is required to manage public lands in such a manner as to protect the quality of the scenic (visual) values of these lands. The RMP amendment/EA will determine if, over time, changes in the condition of the visual resources within the planning area warrant changes to VRM management objectives, and to what degree. VRM objectives (or classes) provide the basic visual management standards for design and development of surface disturbing projects on public lands and are determined through careful analysis and consideration of other land uses, needs and demands. VRM Classes I through IV are designated in the RMP and establish
