

The Honolulu Chinese Citizenship Tutorial Program is a service-learning project site in the Champus Compact National Center for Community Colleges "2+4=Service on Common Ground". The University of Hawai'i at Monoa's College of Social Sciences collaborated with the Kapl'olani Community College, Chaminade University, the Chinese Community Action Coalition and Child and Family Service. Local bilingual college students serve as tutors (during a 10-week session) for Chinese immigrants to help them pass their citizenship exams. The immigrants are recruited by visiting adult education classes, through Chinese radio programs, flyers, and Chinese language newspapers. The Chinese Community Action Coalition provides the curriculum and resources such as Scrabble, books, word-picture matching games, and card games for constructing simple English sentences.

The tutorial sessions focus on passing the INS exam and conversational English. Many of the immigrants are senior citizens. The classes are held in Chinatown. Since the project began, about 1,000 immigrants and refugees have enrolled. Over 300 students have participated as tutors and approximately one-third of the Chinese immigrants became citizens.

Transitional House, Santa Barbara, CA., is a facility that primarily serves homeless Hispanic women. The services are tailored to meet the needs of each family to help women and their children move from homelessness and unemployment to employment and permanent housing. The VISTAs assigned to the project are bilingual. The clientele is 60% monolingual Spanish speakers.

The VISTAs are creating a Career Development Curriculum that is fully translated into Spanish and members host seminars about immigration and consumer credit counseling services. There was a need to improve communication with clients. One of the VISTAs developed "halfsheets", one side in Spanish, the other in English, that explain the services offered by Transition House.

The VISTAs are responsible for placement of children in daycare to enable parents to work. They accompany families to childcare providers to assist with translation and to help make the families feel at ease with placing their children in childcare.

POLICY JUSTIFICATION

Turkey - FFG-7 PERRY Class Guided Missile Frigates

The Government of Turkey has requested a possible sale of two FFG-7 OLIVER HAZARD PERRY class guided missile frigates ESTOCIN (FFG-15) and SAMUEL E. MORISON (FFG-13), two MK 15 MOD 0 Close-in Weapons Systems, two MK 75 MOD 0 76mm gun mounts, two MK 13 MOD 4 guided missile launch systems, two AN/SLQ-32(V)2 Countermeasures Sets, two AN/SQR-19(V)2 Sonar Receiving Sets, two AN/SQS-56 Sonar Sets, two MK 92 Mode 2 Fire Control Systems, two AN/SPS-49(V)4 Radar Sets, upgrade modification kits for 50 SM-1 STANDARD missiles, four M2 machine guns, 10,000 20mm ammunition, sonobuoys and other related ammunition items, shipyard/port support services and post transfer activities relating to "hot ship" turnover of two PERRY class frigates from the U.S. Navy, U.S. Government and contractor engineering and logistics personnel support services, publications, repair and calibration services for shipboard equipment, publications and technical data/drawings, personnel training and training equipment, support equipment, spare and repair parts and other elements of logistics necessary to prepare the frigates for transfer to Turkey in a "Safe to Steam" condition with all shipboard and weapon systems operational. The estimated cost is \$110 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey, while enhancing weapon system standardization and interoperability.

Turkey already has seven U.S. Navy PERRY class frigates in its Navy fleet. Turkey needs these frigates to continue its naval modernization program and enhance its Anti-Submarine Warfare (ASW) capability. The frigates will be provided in accordance with, and subject to the limitation on use and transfer provided under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

The PERRY vessels will be transferred on a "hot ship" basis. The primary effort for transfer will be completed through the Naval Sea Systems Command. There are no prime contractors for provision of the weapon systems applicable to this platform. There are no offset agreements proposed in connection with this potential sale.

The U.S. Government and contractor technical and logistics in-country personnel requirements will be determined following consultations with representatives of the Turkish navy.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 02-01**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vi****(vi) Sensitivity of Technology:**

1. The PHALANX Close-In Weapon System crystals which contain the operating frequencies of the weapon system are considered critical technology and are classified Confidential. Select maintenance and operation publications are also classified Confidential.
2. The guidance and control system and the Target Detecting Device represent technology which if compromised could reveal areas of missile performance and potentially result in the development of countermeasures or equivalent systems capable of reducing weapon system effectiveness. This information could also be used in the development of a system with similar or advanced capabilities.
3. The SM-1 STANDARD missiles will result in the transfer of sensitive technology and information as well as classified and unclassified defense equipment and technical data. The STANDARD missile guidance section, Target Detecting Device (TDD), warhead, rocket motor, steering control section, safety and arming unit, and auto-pilot battery unit are classified Secret. Certain operating frequencies and performance characteristics are classified Secret. STANDARD missile documentation to be provided will include:
 - a. Parametric documents (C)
 - b. Missile Handling Procedures (U)
 - c. General Performance Data (C)

 - e. Dynamics Information (C)
 - f. Flight Analysis Procedures (C)
4. A special tailored software program for the AN/SLQ-32 Countermeasures Set will be developed and will be classified Secret.
5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
6. A determination has been made that Turkey can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
