Abstract: In 2016, EPA issued regulations establishing a process for federally recognized tribes to obtain treatment in a similar manner as states (TAS) for purposes of administering the water quality restoration provisions of Clean Water Act (CWA) Section 303(d), including establishing lists of impaired waters on their reservations and developing total maximum daily loads (TMDLs). The CWA does not require tribes to administer the CWA Section 303(d) program. However, tribes seeking to be authorized must apply for and be found eligible for TAS through the procedures described in the regulations.

Section 303(d) of the CWA requires states, territories, and authorized tribes to identify and establish a priority ranking for waters that do not meet EPA-approved or promulgated water quality standards (WQS) following the implementation of technology-based controls. For waters so identified, Section 303(d) requires states, territories, and authorized tribes to establish TMDLs in accordance with their priority ranking for those pollutants the Administrator identified as suitable for TMDL calculation. A TMDL is the calculation and allocation to point and nonpoint sources of the maximum amount of a pollutant that a water body can receive and still meet applicable WQS, with a margin of safety.

Form numbers: None.

Respondents/affected entities: Any federally recognized tribe with a reservation.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: Five.

Frequency of response: Once for initial TAS status, thereafter biennially for lists of impaired waters, and from time to time for TMDLs.

Total estimated burden: 34,757 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2,309,452 (per year). This action does not include annualized capital or operation & maintenance costs.

Changes in estimates: There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Director, Regulatory Support Division.

Abstract: The Emission Guidelines (EG) (40 CFR part 60, subpart Ce) for Hospital/Medical/Infectious Waste Incinerators were proposed on February 27, 1995; promulgated on September 15, 1997; and revised on both October 6, 2009 and April 4, 2011. The Federal Plan Requirements for these regulations (40 CFR part 62, subpart HHH) were proposed on July 6, 1999; promulgated on August 15, 2000; and revised on May 13, 2013. Subpart Ce requires either states or tribes to develop plans to implement the EG. If approvable state or tribal plans were not developed, the EPA was required to develop a Federal plan (Subpart HHH) to implement the Emission Guidelines for such states and tribes. The Federal plan is an interim measure to ensure that emissions standards are implemented until states assume their role as the preferred implementers of the EG. The 2013 rule finalized amendments to the HMIWI federal plan to implement the amended EG adopted on October 6, 2009, for those states that did not have an approved revised/new state plan in place within 2 years after promulgation of the EG. The regulations in 40 CFR part 60, subpart Ce and 40 CFR part 62, subpart HHH apply to each existing individual hospital/medical/infectious waste incinerator (HMIWI) that either commenced construction prior to December 2, 2008 or commenced modification prior to April 6, 2010. This information is being collected to assure compliance with 40 CFR part 60, subpart Ce and 40 CFR part 62, subpart HHH.

Form numbers: None.

Respondents/affected entities: Hospital/Medical/Infectious Waste Incinerators.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart Ce and 40 CFR part 62, subpart HHH).

Estimated number of respondents: 28 existing respondents, consisting of 16 privately-owned, 1 Federally-owned, 1 State/locally owned HMIWI facilities, plus 10 States requiring State Plan Inventories (total).

Frequency of response: Semiannually and annually.

Total estimated burden: 19,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,430,000 (per year), which includes \$239,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: The decrease in burden from the most-recently approved ICR is due to a decrease in the number of sources due to a decline in the industry. This decrease is not due to any program changes. The number of sources has declined as HMIWI units have closed. Any new units that either commence construction after December 2, 2008 or commence modification after April 6, 2010 are subject to the new source performance standards at 40 CFR part 60, subpart Ec. The decrease in the operation and maintenance costs from the currently-approved ICR is also due to the decline in the number of HMIWI units. There are no changes to the capital costs because there are no new entities subject to 40 CFR part 60, subpart Ce or 40 CFR part 62, subpart HHH.

Director, Regulatory Support Division.
