SUPPLEMENTARY INFORMATION:

Background

On April 22, 2025, the Secretary of Commerce initiated an investigation

under Section 232 (19 U.S.C. 1862) to determine the effects on national security of imports of medium-duty trucks, heavy-duty trucks, and medium- and heavy-duty truck parts, and their derivatives.

The term “medium-duty trucks” means trucks with a gross vehicle weight of more than 10,000 and under 26,001 pounds. The term “heavy-duty trucks” means trucks with a gross vehicle weight rating of 26,001 pounds or more. For the purposes of this investigation, trucks are motor vehicles for the transport of goods. The term “medium- and heavy-duty truck parts” refers to the individual components and systems of medium- and heavy-duty trucks, including engines and engine parts, transmissions and powertrain parts, and electrical components. Hereafter, “medium-duty trucks,” “heavy-duty trucks,” and “medium- and heavy-duty truck parts” shall be referred to collectively as “trucks and truck parts.”

Request for Public Comments

This investigation is being undertaken in accordance with part 705 of the National Security Industrial Base Regulations (15 CFR parts 700 to 709) (NSIBR). Interested parties are invited to submit written comments, data, analyses, or information pertinent to this investigation to BIS’s Office of Strategic Industries and Economic Security no later than May 16, 2025. The Department is particularly interested in comments and information directed at the criteria listed in § 705.4 of the regulations as they affect national security, including the following:

- (i) The current and projected demand for trucks and truck parts in the United States;
- (ii) The extent to which domestic production of trucks and truck parts can meet domestic demand;
- (iii) The role of foreign supply chains, particularly of major exporters, in meeting United States demand for trucks and truck parts;
- (iv) The concentration of United States imports of trucks and truck parts from a small number of suppliers and the associated risks;
- (v) The impact of foreign government subsidies and predatory trade practices on the competitiveness of the medium- and heavy-duty truck industry in the United States;
- (vi) The economic impact of artificially suppressed prices of trucks and truck parts due to foreign unfair trade practices and state-sponsored overproduction;
- (vii) The potential for export restrictions by foreign nations,

including the ability of foreign nations to weaponize their control over supplies of trucks and truck parts;

(viii) The feasibility of increasing domestic capacity for trucks and truck parts to reduce import reliance;

(ix) The impact of current trade policies on domestic production of trucks and truck parts, and whether additional measures, including tariffs or quotas, are necessary to protect national security; and

(x) Any other relevant factors.

Material submitted by members of the public that is business confidential information will be exempted from public disclosure as provided for by § 705.6 of the regulations (see the **ADDRESSES** section of this notice). Communications from agencies of the United States Government will not be made available for public inspection. BIS does not maintain a separate public inspection facility. Requesters should first view the Bureau’s web page, which can be found at: <https://efoia.bis.doc.gov/> (see “Electronic FOIA” heading).
