n. *Comments, Protests, or Motions to Intervene*: Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Responsive Documents*: Any filing must (1) bear in all capital letters the title “COMMENTS”, “PROTEST”, or “MOTION TO INTERVENE” as applicable; (2) set forth in the heading, the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to project works which are the subject of the license amendment. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document

on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9941–00–OW]

National Coastal Condition Assessment 2010

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of the final National Coastal Condition Assessment (NCCA) 2010. The NCCA describes the results of a nationwide coastal probabilistic survey that was conducted in the summer of 2010 by the Environmental Protection Agency (EPA) and its state, tribal, and federal partners. Results include estimates of coastal area with good, fair, and poor biological quality, water quality, sediment quality, and ecological fish tissue quality. Results are presented nationally and regionally for the Northeast, Southeast, Gulf of Mexico, West, and Great Lakes coasts. The NCCA 2010 also includes information on how the survey was implemented, and future actions and challenges.

FOR FURTHER INFORMATION CONTACT: Hugh Sullivan, Office of Wetlands, Oceans and Watersheds, Office of Water, Washington DC Phone: 202–564–1763; email: sullivan.hugh@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

To better answer questions about the condition of waters across the country, EPA and its state and tribal partners have embarked on a series of surveys under the National Aquatic Resource Surveys (NARS) program. The NCCA 2010 is the most recent in this series of surveys. The key goals of the NCCA 2010 are to describe the ecological condition of the nation's coastal and Great Lakes nearshore waters, how those conditions are changing, and the key stressors affecting those waters. An important component of the NCCA is collaboration with state, tribal, and

federal partners in developing new monitoring tools and analytical approaches and in advancing the science of coastal monitoring. The survey uses a statistical design to sample 1,104 randomly-selected sites that represent the condition of the larger population of coastal waters in the conterminous United States. This is the first time the nearshore waters of the Great Lakes have been included in a national statistically-based survey.

The report finds that more than half of the nation's coastal and Great Lakes nearshore waters are rated in good condition for biological and sediment quality, while about one third are rated in good condition for water quality and less than one percent are rated in good condition based on the potential harm that fish tissue contaminants pose to predator fish, birds, and wildlife. Excessive phosphorus is the greatest contributor to the poor water quality rating. Selenium is the greatest contributor to the poor rating for potential harm to predator fish, birds and wildlife from fish tissue contaminants. The draft report has undergone peer, state and EPA review.

A. How can I get copies of the NCCA 2010 and other related information?

You may access the NCCA 2010 from EPA's Web site at <http://www.epa.gov/national-aquatic-resource-surveys/ncca>.
