New Tolerance Exemption

1. *PP 3F8176*. (EPA-HQ-OPP-2013-0717). Anatis Bioprotection, Inc., 278, rang Saint-André, St-Jacques-le-Mineur, Quebec JOJ 1Z0, Canada (represented by Technology Sciences Group, Inc., 712 Fifth St., Suite A, Davis CA 95616), requests to establish an exemption from the requirement of a tolerance for residues of the microbial insecticide, *Beauveria bassiana* strain ANT-03, in or on all food commodities. The petitioner believes no analytical method is needed because their expectation is that, when used as proposed, *Beauveria bassiana* strain ANT-03 would not result in residues that are of toxicological concern. (BPPD)

2. *PP IN-10604*. (EPA-HQ-OPP-2013-0700). Gowan Company, LLC, P.O. Box 5569, Yuma, AZ 85366 requests to establish an exemption from the requirement of a tolerance for residues of ammonium acetate (CAS Registry No. 631-61-8), under 40 CFR 180.920, when used at not more than 15% of a pesticide formulation, as a preharvest inert ingredient in or on raw agricultural commodities. The petitioner believes no analytical method is needed because it is not required for the establishment of a tolerance exemption for inert ingredients. Based on the physical chemical characteristics of ammonium acetate, there is little likelihood of foliar residues remaining on treated crops. Ammonium acetate is highly soluble in water and undergoes rapid environmental degradation in soil and water, breaking down into acetate and ammonium. Acetate/acetic acid as such would not be expected to remain on foliage and or bioaccumulate or persist in humans. Therefore, analytical methods to assess residues of ammonium acetate are not required. (RD)

RIN 2137-AE58

Hazardous Materials: Adoption of ASME Code Section XII and the National Board Inspection Code

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA is proposing to amend the Hazardous Materials Regulations applicable to the design, construction, certification, recertification and maintenance of cargo tank motor vehicles, cryogenic portable tanks and multi-unit tank car tanks (ton tanks) in response to petitions for rulemaking from the American Society of Mechanical Engineers (ASME), the National Board of Boiler and Pressure Vessel Inspectors (National Board), and the Pressure Vessel Manufacturers Association (PVMA). Specifically, this NPRM proposes to allow the use of the 2013 edition of the ASME's *Boiler and Pressure Vessel Code, Section XII* (Section XII) for the design, construction, and certification of cargo tank motor vehicles, cryogenic portable tanks and ton tanks. PHMSA also proposes to authorize the use of the 2013 edition of the National Board of Boiler and Pressure Vessel Inspectors' *National Board Inspection Code (NBIC)*, as it applies to the continuing qualification and maintenance of ASME constructed cargo tank motor vehicles, cryogenic portable tanks, and ton tanks constructed to standards in ASME's *Section XII*, and existing cargo tank motor vehicles and portable tanks constructed to *Section VIII, Division 1*. If adopted, these amendments will allow for regulatory flexibility, without compromising safety.

DATES: Submit comments by March 31, 2014. To the extent possible, PHMSA

will consider late-filed comments as we determine whether additional rulemaking is necessary.
