

successful conclusion of a successful qualifying incubation relationship. The standard term for an incubation relationship is three years.

Commission staff will use the applications, certified statements, and contracts submitted by potential incubating and incubated entities, along with any responses to Commission requests for additional information to determine qualifications for participation in the incubator program.

Commission staff will use the periodic reports to determine whether ongoing incubation relationships are proceeding in a manner consistent with the parties' initial filings and are likely to result in a successful incubation relationship. At the end of a successful incubation relationship, either the incubated entity will own and operate a full-service AM or FM station independently or the incubated station will be on a firmer footing if the station was struggling at the start of the relationship.

In the event the parties seek to extend the duration of their incubation

relationship beyond the standard three-year term, the filing of a request for such an extension will enable Commission staff to gauge the types of problems incubating parties are experiencing. Information provided by the parties to the Commission no later than six months before the contract termination date will allow Commission staff to evaluate which option for station ownership the incubating parties plan to pursue at the conclusion of the relationship—*i.e.*, whether the incubated entity plans to keep the incubated station or purchase a new station. Additionally, Commission staff will review documentation submitted to seek a reward waiver to assess whether the market where the reward waiver is sought is comparable to the market where the incubated station was located.
