

helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected.

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of response).

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The NPS Social Science Program (SSP) is authorized by 54 U.S.C. 100701 to collect information that will improve the ability of the NPS to provide state-of-the-art management, protection, and interpretation of, and research on, the resources of the System. However, the data currently available from survey research is insufficient for generalizing findings across all national park units in the System with regards to visitor experiences, attitudes, and spending behaviors. Past and present socioeconomic research in NPS units do not allow for comparison across units or against a regional and nationwide benchmark of information. Without this data, local, regional, and national-level NPS managers lack a comprehensive understanding of visitor demographics, economic contribution, and visitation related experiences in park units needed to monitor how well the System is serving the public.

In 2016, the NPS SSP conducted a pilot study in 14 NPS units to identify and better understand the need for more advanced socioeconomic monitoring. The pilot study produced and verified a study design that will allow SSP to fully implement a Socioeconomic Monitoring Study (SEM). Building on the findings from the pilot study, the SEM will collect information from visitors in up to 30 National Park units annually to provide generalizable results for NPS managers and planners across the System to understand and monitor: visitor demographics, economic contribution, services, facilities and infrastructure investments. Individual park units will be able to compare their unit with regional and national-level data to make informed decisions in future planning and management efforts.
