coordination of NMFS OPR. NMFS has conducted an environmental review of OPR's coordination role related to the STSSN and the formalization of their program protocols and roles described in the Draft 2024 STSSN Operating Procedures Handbook.

The STSSN is a cooperative effort to reduce causes of morbidity and mortality in sea turtles by responding to and documenting sea turtles, found either dead or alive (but compromised), in a manner sufficient to inform conservation management and recovery. The proposed activities considered in the draft EA are limited to the coordination role that OPR holds, activities NMFS staff will conduct in the field related to stranding coordination, response, and mortality investigation, and direct takes of sea turtles while responding to stranding incidents that have occurred because of human activity or natural causes of illness, injury, or mortality.

National Environmental Policy Act

This notice is provided pursuant to section 10(c) of the ESA and the NEPA (42 U.S.C. 4321, et seq.). This draft EA was prepared in accordance with NEPA (42 U.S.C. 4321, et seq.) and NOAA policy and procedures (NOAA Administrative Order [NAO] 216–6A and the Companion Manual [CM] for the NAO 216–6A).

Alternatives Considered

NMFS' proposed action is the continued coordination of the STSSN by NMFS OPR and the review of program protocols and best practices, which have been consolidated and updated in the Draft 2024 STSSN Operating Procedures Handbook. In preparing the draft EA, NMFS considered the following two alternatives for the proposed action.

Alternative 1: No Action. In accordance with the NOAA CM for NAO 216-6A, section 6.B.i, Under the No Action Alternative, NMFS OPR would absolve its role coordinating the STSSN. Under this alternative, the STSSN would continue to operate as prescribed in the species Recovery Plans, but only under existing state programs that are permitted through the USFWS permit authority, or through direct permits to stranding response organizations and rehabilitation facilities. Stranding response activities would be maintained, but without NMFS OPR involvement. The Council on Environmental Quality Regulations and the CM for NAO 216-6A require consideration and analysis of a no action alternative for the purposes of presenting a comparative analysis to the action alternatives. The no action

alternative, serves as a baseline against which the impacts of the action alternatives will be compared and contrasted.

Alternative 2: Continued Operation of the STSSN under NMFS Coordination, Guided by the Draft 2024 STSSN Operating Procedures Handbook. Under Alternative 2, NMFS OPR would continue to coordinate the STSSN and would finalize the Draft 2024 STSSN Operating Procedures Handbook as a guide for the continued operation of the STSSN. The STSSN has been in operation for decades, and the Operating Procedures seeks to consolidate various guidance documents and clearly outline the roles and responsibilities of STSSN participants.

Final determinations will not be completed until after the end of the 30-day comment period and NMFS will fully consider all public comments received during the comment period. If finalized and adopted, NMFS will publish the Final STSSN Operating Procedures Handbook to its website.

SUPPLEMENTARY INFORMATION:

Agenda

The Committee and Advisory Panel will continue work on the Council's Essential Fish Habitat (EFH) Review. They will consider technical information, next steps, and future Council actions related to: fishing impacts to EFH and measures to minimize adverse effects, necessary updates to EFH including prioritization across multiple Council actions during 2025-2027, and conceptual frameworks for designating Habitat Areas of Particular Concern and evaluating cumulative effects on EFH. They also plan to review recommendations for next steps and future Council actions developed at the December joint meeting with Mid-Atlantic Fishery Management Council's (MAFMC) Ecosystem and Ocean Planning Committee, as needed. The Committee and Advisory Panel will also discuss habitat and ocean planning work priorities for 2025. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the

emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Ph.D., Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.
