

for this determination in an Environmental Action Statement, which is also available for public review.

The presence of both CRLF and VELB on the enrolled properties is uncertain at this time due to lack of detailed survey information. For the purposes of the Agreement, the Service and Applicants have set the baseline for CRLF and VELB as the habitat that existed on the ranches prior to wetland creation activities. Therefore, the CRLF baseline is 18 reservoirs comprising approximately 45 acres. Sixteen of the reservoirs occur on the Burrows Ranch and two on the Big Bluff Ranch. For the VELB, the baseline is 65 naturally occurring elderberry bushes, of which 39 occur on the Burrows Ranch and 25 occur on the Big Bluff Ranch.

Under the Agreement, the Applicants would or have undertaken activities to benefit the CRLF. The Applicants have fenced nine existing reservoirs and six newly created ponds and installed watering troughs in order to exclude livestock from the reservoirs. The Applicants propose to: (1) Manage existing wetlands (through the use of livestock or light equipment) to maintain open water and wetland vegetation to benefit CRLF; (2) where practical and feasible for the Applicants and where it does not interfere with the operation of the Ranches, undertake bullfrog eradication efforts in ponds where bullfrogs are present; and (3) where practical and feasible for the Applicants and where it does not interfere with the operation of the Ranches, fence additional reservoirs and newly created ponds to exclude livestock. In addition to this, Burrows Ranch has created approximately 5.7 acres of ponds. These ponds were developed through a cooperative agreement with the Service's Partners for Fish and Wildlife program.

To benefit the VELB the Applicants propose to: (1) Manage vegetation and activity around the elderberry plants following the most current guidelines and measures developed and approved by the Service; (2) allow for recruitment of elderberry plants within riparian areas near existing elderberry plant communities by allowing all newly established elderberry plants within 50 feet of existing elderberry plants to grow and mature; and (3) work with the Service to identify suitable habitat areas and once funding is secured, plant elderberry bushes in areas amenable to the Applicants.

Under the Agreement, consistent with the Service's Safe Harbor Policy published in the **Federal Register** on June 17, 1999 (64 FR 32717), the Service would issue a permit to the Applicants

authorizing incidental take as a result of normal land management activities on the Ranches' 7,450 acres. The properties subject to this Agreement range in elevation from approximately 800 feet to 1,760 feet and have traditionally been used for agricultural production, including cattle grazing and farming for dry land crops. Some of the land use activities that the Applicants have completed to further their land stewardship goals and to increase income from hunting and livestock grazing include creating wildlife habitat ponds for waterfowl, amphibians, game species, and others; fencing existing reservoirs and installing watering troughs in order to exclude livestock from the reservoirs to improve habitat for waterfowl; maintaining and monitoring wood duck nest boxes; clearing decadent brush and reseeding to annual clovers and perennial grasses to provide wildlife food and cover; planting grains and alfalfa for wildlife; and holding annual Stewardship Days in which neighbors, college students, resource agency employees, and others learn about sustainable ranch management and wildlife habitat improvement techniques, conduct vegetation and wildlife monitoring, and more.

If we determine that the requirements are met, we will sign the proposed Agreement and issue an enhancement of survival permit under section 10(a)(1)(A) of the Act to the Applicants for take of the CRLF and the VELB incidental to otherwise lawful activities in accordance with the terms of the Agreement. We will not make our final decision until after the end of the 30-day comment period and will fully consider all comments received during the comment period.
