

Otsego, Delaware, and Schoharie Counties, New York. Constitution's project involves 124.4 miles of new 30-inch-diameter natural gas pipeline and appurtenant facilities that include two new meter stations, two pipe interconnections, ten communication towers, eleven mainline valves, and one pig launcher and receiver.¹ Iroquois' project facilities include the addition of 22,000 horsepower of incremental compression and other miscellaneous modifications to its existing Wright Compressor Station.

Paper copy versions of this EIS were mailed to those specifically requesting them; all others received a CD version. In addition, the EIS is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502-8371.
