distributed to PACHA members should submit materials to the Acting Executive Director, PACHA, whose contact information is listed above prior to close of business August 4, 2003.

This notice is being published less than 15 days in advance of the meeting due to issues pertaining to technical arrangements.

Dated: July 25, 2003.

### Josephine B. Robinson,

Acting Executive Director, Presidential Advisory Council on HIV/AIDS.

[FR Doc. 03-19566 Filed 7-31-03; 8:45 am]

BILLING CODE 4150-28-M

# DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Centers for Disease Control and Prevention

[30 Day-56-03]

#### Proposed Data Collections Submitted for Public Comment and Recommendations

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498–1210. Send written comments to CDC, Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 or by fax to (202) 395–6974. Written comments should be received within 30 days of this notice.

Proposed Project: Risk Factors for Microbial Contamination of Produce: A Field Study of Domestic and Imported Produce in Packing Sheds (OMB No. 0920–0487)—Reinstatement—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

#### **Background**

Foodborne diseases are common; an estimated 6–33 million cases occur each year in the United States. Although most of these infections cause mild illness, severe infections and serious complications do occur. The public health challenges of foodborne diseases are changing rapidly. In recent years, new and emerging foodborne pathogens have been described and changes in food production have led to new food safety concerns. Foodborne diseases have been associated with many different foods, including recent outbreaks linked to contaminated fresh

fruits (e.g., cantaloupe, strawberries) and vegetables (e.g., leaf lettuce, alfalfa sprouts).

NCEH proposes to conduct a study to determine what specific produce processing practices are associated with fecal contamination of fruits and vegetables. Handling and processing methods used in the produce industry may increase the risk that these foods will become contaminated with fecal matter. The study will describe the chain of processing-shipping practices for five vulnerable produce groups (leafy greens, leafy herbs, green onions, cabbage, melon/cantaloupe). Critical practices where contamination with foodborne pathogens is likely will be identified by measuring the microbial quality of produce at each step during processing. Sources of fecal contamination will be determined by measuring the microbial quality of process water, measuring fecal indicator organisms on hand rinses from packing shed laborers, and conducting sanitary surveys of sources of human and animal feces in and around the processing

CDC, National Center for Environmental Health is requesting a three-year clearance. The total burden hours is estimated to be 172.5.

Respondents	Number of respondents	Number of responses/ respondent	Avg. burden/ response (in hours)
Packing Facility Recruiting visit	25	1	30/60
	20	6	30/60
	100	6	10/60

Dated: July 24, 2003.

#### Laura Y. Martin,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Written comments should be received within 30 days of this notice.

Proposed Project: AIDS Prevention Surveillance Project Reports (OMB No. 0920–0208)—Extension—National Center for HIV, STD, and TB Prevention (NCHSTP), Centers for Disease Control and Prevention. CDC proposes to continue the collection of data for the AIDS Prevention and Surveillance Project Reports, OMB No. 0920–0208, for an additional three years. This request is for a three-year extension. There are currently 65 cooperative agreements for HIV prevention projects (50 states, 6 cities, 7 territories, Washington, DC, and Puerto Rico) and

54 community based organizations to support HIV counseling, testing, and referral programs funded by CDC. Program initiatives such as HIV counseling, testing, and referral services in STD clinics, Women's Health Centers, Drug Treatment Centers, and other health facilities have been described as a primary prevention strategy of the national HIV prevention program. The funded public health departments and community based organizations have increased the provision of HIV counseling, testing, and referral activities to those at increased risk for acquiring or transmitting HIV, as well as minority communities and women of child bearing age.

CDC is responsible for monitoring and evaluating HIV prevention programs conducted under the HIV Prevention cooperative agreements. HIV counseling, testing, and referral services are a major component of HIV
