Title: NSPS: Small Municipal Waste Combustors (40 CFR part 60, subpart AAAA) (OMB Control No. 2060-0423, EPA ICR Number 1900.02). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: This addresses information collection activities that would be imposed by the NSPS: Small Municipal Waste Combustors, 40 CFR part 60, subpart AAAA. This information collection is required as a result of the implementation of the NSPS that are being developed under the authority of sections 111 and 129 of the Clean Air Act (CAA). Reporting and recordkeeping requirements would apply to MWC units that have the capacity to combust greater than 35 tons per day (tpd) but less than 250 tpd of municipal solid waste.

This ICR will enable EPA to monitor compliance with emission standards for regulated pollutants. Owners and

operators of small MWCs are required to measure, record, and report emission rates and operating parameters, follow good combustion practices (GCP), and submit a siting analysis. The responses to this NSPS are mandatory.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,100 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Small MWCs that combust greater than 35 tons per day (tpd) but less than 250 tpd of municipal solid waste.

Estimated Number of Respondents: 6 plants with 2 small MWC units each.

Frequency of Response: Initial, Quarterly, Semi-annual, Annual.

Estimated Total Annual Hour Burden: 25,201 hours.

Estimated Total Annual Cost: \$806,474, includes \$200,000 annualized capital and \$77,000 O&M costs.

Changes in the Estimates: There is a increase of 16,642 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to the new small municipal waste combustors that have begun operating.

Dated: February 28, 2003.

Oscar Morales,

Director, Collection Strategies Division.
