[Docket No. FAA-2020-0727; Airspace Docket No. 20-ACE-18]

RIN 2120-AA66

Amendment of Class E Airspace; Cambridge, NE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the Class E airspace extending upward from 700 feet above the surface to properly contain instrument flight rules (IFR) operations at the airport. This action also removes the Harry Strunk NDB from the Class E5 text header and airspace description. Additionally, this action corrects the airport's geographic coordinates.

DATES: Effective 0901 UTC, June 17, 2021. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is

promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the Class E airspace at Cambridge Municipal Airport, Cambridge, NE, to ensure the safety and management of IFR operations at the airport.

History

The FAA published a notice of proposed rulemaking in the **Federal Register** (85 FR 79934, December 11, 2020) for Docket No. FAA-2020-0727 to modify Class E airspace at Cambridge Municipal Airport, Cambridge, NE. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Subsequent to publication of the NPRM, the FAA identified a typographical error in The Proposal section of the NPRM. The sentence in the NPRM's proposal that reads "To properly contain IFR departures to 700 feet above the surface the 6.4-mile radius should be increased to a 7.5-mile radius of the airport." Should have read "To properly contain IFR departures to 1,200 feet above the surface, the 6.4-mile radius should be increased to a 7.5-mile radius of the airport." The Final Rule corrects 700 feet to 1,200 feet in The Rule section of this document. The correction does not impact the airspace's lateral or vertical dimensions.

Class E5 airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14 Code of Federal Regulations part 71 modifies the

Class E airspace extending upward from 700 feet above the surface. To properly contain IFR departures to 1,200 feet above the surface, the 6.4-mile radius of the airport is increased to a 7.5-mile radius of the airport.

Further, this action removes the Harry Strunk NDB from the airspace text header and the airspace description. The navigation aid (NAVAID) is being decommissioned and is not needed to describe the airspace.

Lastly, this action corrects the airport's geographic coordinates to lat. 40°18'24" N, long. 100°09'43" W.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant the preparation of an environmental assessment.
