International Trade Administration

Aerospace Supplier Development Mission to China

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

Mission Description

The United States Department of Commerce, International Trade Administration, U.S. and Foreign Commercial Service (CS) is organizing an Aerospace Supplier Development

Mission to China from November 7-17, 2010.

The 2010 Aerospace Supplier Development Mission to China is being developed due to a successful similar trade mission to China in 2008 and due to continued requests from many small and medium-sized enterprises (SMEs) supplying the aviation industry. It is intended to include representatives from a variety of U.S. aerospace industry manufacturers and service providers, and it will introduce these suppliers to end-users and prospective partners whose needs and capabilities are targeted to each U.S. participant's strengths. Participating in an official U.S. industry delegation, rather than traveling to China on their own, will enhance the companies' ability to secure meetings in China. The mission will include appointments and briefings in Beijing, Shanghai, Xi'an, and Guangzhou, some of China's major aerospace industry hubs, as well as participation in Airshow China in Zhuhai to conclude the mission. The mission participants will have opportunities to interact extensively with CS China aviation specialists to discuss industry developments, opportunities, and sales strategies.

Commercial Setting

The Chinese aerospace sector ranks among the world's most dynamic, going far beyond the country's massive investment in aircraft (mainland carriers anticipate reaching 4,000 by 2025). Chinese aerospace companies have rapidly developed into serious players in the industry's global value chain. Chinese aerospace firms, including those linked to U.S. and European "primes," now frequently make their own sourcing decisions, participate as "risk sharing partners" in new airframe and engine development programs, or take on the role of first-tier suppliers on Chinese programs.

The evolution of China's aerospace industry is part of a broader industry trend toward supply chain consolidation and lean manufacturing. Many traditional Tier 1 supplier responsibilities are being pushed down the supply chain to second- and third-tier suppliers. As the larger firms move into aerospace system integration, the lower-tier suppliers have little choice but to globalize themselves. This involves supplying China with products and services that might historically have been provided to U.S. and European suppliers that have since shifted production. In many cases, once established in China, the first-tier firms require their supply chain partners to begin dealing directly with Chinese

members of the supply chain. While extremely challenging for SME suppliers, these new relationships bring an added benefit—the opportunity for additional sales with other aerospace companies doing business in China.

China Aviation Industry Corporation I and II (AVIC I and II), conglomerates of hundreds of companies, control the country's aerospace industry. Over the years, the main AVIC companies have formed joint-venture companies with key Western aerospace partners. The larger AVIC companies also have so-called "foreign divisions" engaged in manufacturing, design and engineering for Western customers on a semi-autonomous basis.

Mission Goals

The goals of the 2010 Aerospace Supply Chain Development Mission to China are threefold: (1) To introduce U.S. companies to Chinese joint-venture groups and Western original equipment manufacturers (OEMs); (2) to explore supplier opportunities under other aerospace programs (including Chinese programs and Western programs with Chinese firms "risk sharing"); and (3) to facilitate an effective U.S. presence at Airshow China.

Mission Scenario

The mission's first stop is Beijing, home to AVIC's headquarters and the China National Aero-Technology Import and Export Corporation (CATIC), AVIC's trading and purchasing division. The second and third stops are Shanghai and Xi'an, home to Xi'an Aircraft Industry Group and the Yanliang National Aviation High-Tech Industrial Base. The fourth stop, Guangzhou, provides the opportunity to focus on Guangzhou Aircraft Maintenance Engineering Company Limited (GAMECO) as an example of a maintenance/repair/overhaul operation and a meeting with MTU Zhuhai.

The mission will conclude in Zhuhai, at the China International Aviation and Aerospace Exhibition (known as Airshow China), the only Chinese aerospace exhibition endorsed by the Chinese central government. The last Airshow China, in 2008, marked the largest ever in the show's history. It attracted 600 exhibitors from 35 countries, showcased 58 aircraft including the Airbus A380 and turned out over 90,000 trade visitors along with 200 media units. CS Guangzhou will provide entry to the trade show and will help facilitate the U.S. companies' participation in the American Product Literature Center.

Matchmaking efforts will involve coordination with the American
