OMB Control Number: 0535–0226.

Expiration Date of Previous Approval: November 1, 2019.

Type of Request: Intent to Seek Reinstatement of an Information Collection.

Abstract: The census of agriculture is the primary source of statistics concerning the nation's agricultural industry. It provides the only basis of consistent, comparable data for each county, county equivalent, and state in the United States and its outlying insular areas. The census is conducted every 5 years, the last one being for the reference year of 2017. The 2022 Census of Agriculture will again cover all agricultural operations in the 50 states, Puerto Rico, Guam, the U.S. Virgin Islands, the Commonwealth of Northern Mariana Islands (CNMI), and American Samoa which meet the census definition for a farm. For the 50 states, Guam, and CNMI, a farm is any place that produced and sold, or normally would produce and sell, \$1,000 or more of agricultural products during the census reference year. For Puerto Rico and the U.S. Virgin Islands it is any place with \$500 in production and sales. American Samoa is not limited by a threshold for production or sales and includes items grown for home consumption.

Data collection for the censuses of agriculture for the 50 states and Puerto Rico will be conducted primarily by
