I. Funding Opportunity Description

Purpose of Program: The purpose of this program is to: (1) Improve results for children with disabilities by promoting the development, demonstration, and use of technology; (2) support educational media activities designed to be of educational value to children with disabilities; (3) provide support for some captioning and video description; and (4) provide cultural experiences through appropriate nonprofit organizations.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv), this priority is from allowable activities specified in the statute (see sections 661(e)(2) and 687 of the Individuals with Disabilities Education Act, as amended (IDEA)).

Absolute Priority: For FY 2004 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technology and Media Services for Individuals With Disabilities—National Instructional Materials Accessibility Standard:

Background: The No Child Left Behind Act of 2001 (NCLB) requires that all students, including those with disabilities, participate in State assessments. This requirement underscores the critical importance of IDEA requirements related to access, participation, and progress in the general curriculum. Specifically, the regulations implementing IDEA state that one of the purposes of "specially-designed instruction" is to adapt the content, methodology, or delivery of instruction in order "to ensure access of the child to the general curriculum, so that he or she can meet the educational standards within the jurisdiction of the public agency that apply to all children." 34 CFR Part 300.26(b)(3)(ii).

Currently, both special and regular educators face challenges in providing students with disabilities access to the general curriculum, especially with regard to rigorous academic content. Research indicates that the use of accessible materials substantially reduces learning barriers and demonstrates the benefits of using accessible materials in the classroom (Barker & Torgesen, 1995; Botte, 1999; Dalton et al, 2001; Erdner, Guy & Bush, 1998; MacArthur & Haynes, 1995; Wise, Ring, & Olson, 1999). Urgent and critical needs exist for improving access to accessible instructional resources that are available in a timely manner for use in all classrooms.

To help address these critical needs, the National File Format (NFF)

Technical Panel, representing educators, publishers, technology specialists, and advocacy groups, was established. The NFF Technical Panel recently developed, with consensus, a common standard for digital files that can be used to produce accurate and reliable alternate formats for educational materials from the same source file. This standard is known as the National Instructional Materials Accessibility Standard (NIMAS, version 1.0) and should help improve the timely access to accessible materials for those students with blindness, low vision, and print disabilities. The NIMAS is available at <http://www.cast.org/NFF/NIMAS/>

Priority: The Secretary establishes an absolute priority, which supports cooperative agreements for two centers. The NIMAS Development Center must provide national leadership in furthering the development and maintenance of the NIMAS. The NIMAS Technical Assistance Center must provide assistance to States on the availability of NIMAS and how NIMAS can be used to improve the capacity of States to provide accessible instructional materials to students with disabilities in a more efficient, cost-effective manner.

Development and Maintenance Activities of the Development Center must include, but are not limited to:

(a) Making recommendations to the Department regarding whether technical updates to the NIMAS are appropriate due to advances in technology and changes in the ANSI/NISO Z39.86 standard; examining issues and making recommendations to the Department related to the development of subsequent versions of the NIMAS that address accessibility needs of a broader range of students with disabilities than the current NIMAS (Version 1.0), including consideration of the principles of universal design; and, subject to the approval of the Department, developing subsequent versions of the NIMAS;

(b) Establishing a NIMAS Committee to provide advice to the grantee on issues related to the grantee's activities, including the issues identified in paragraph (a);

(c) Evaluating the feasibility of adopting a free market distribution model and making recommendations to the Department related to steps it might take to facilitate such an approach;

(d) Maintaining communication and collaboration with the NIMAS Technical Assistance Center; and

(e) Conducting evaluations of specific activities and of the overall impact of the Center's work including whether

adoption of the NIMAS standard results in greater and more timely availability of materials. The Center must report its evaluation findings at least annually to the Federal project officer.

Technical Assistance and Dissemination Activities of the Technical Assistance Center must include, but are not limited to:

(a) Developing and implementing a strategic plan of technical assistance to States that have adopted or are considering adoption of NIMAS and other entities involved with the implementation of NIMAS in collaboration with the Regional Resource Centers and the National Center on Technology Innovation;

(b) Maintaining a user-friendly Web site with relevant information and documents in an accessible format;

(c) Maintaining communication and collaboration with other Department funded projects such as the National Center on Technology Innovation, the Technology Implementation Center, the new NIMAS Development Center, the IDEA Partnerships, the Regional Resource Centers, the National Center on Secondary Education and Transition (NCSET), the K-8 Access Center, and other research, demonstration, and technical assistance centers, as appropriate, to coordinate information and dissemination activities related to NIMAS and promote consistent implementation of NIMAS;

(d) Building awareness about NIMAS among States and other relevant organizations;

(e) Establishing a Technical Maintenance Group to define strategies for valid and consistent technical implementation of the standard;

(f) Supporting a timely phase-in of the NIMAS specifications within States; and

(g) Conducting evaluations of specific activities and of the overall impact of the Center's work. The Technical Assistance Center must report its evaluation findings at least annually to the Federal project officer.

Each Center must also:

(a) Meet with the Office of Special Education Programs (OSEP) project officer in the first two months of the project to review and refine the strategic plan of support and dissemination approaches.

(b) Communicate with the Federal project officer through monthly teleconferences and e-mail communication as needed. The Center must submit annual performance reports and provide additional written materials as needed for the Federal project officer to monitor the Center's work.

(c) Budget for a two-day Project Directors' meeting in Washington, DC during each year of the project. In addition to the two-day Project Director's Meeting, each Center must budget for at least two annual planning meetings with Department officials, and at least two, two-day trips annually as requested by OSEP to attend meetings such as Department briefings, Department-sponsored conferences, and other OSEP-requested activities.

Fourth and Fifth Years of Project: If continued need for technical assistance and development exists, the Secretary will consider continuation of the projects for the fourth and fifth years under the requirements of 34 CFR 75.253(a), and in addition—

(a) The recommendation of a review team consisting of experts selected by the Secretary which review will be conducted during the last half of the project's third year in Washington, DC. Projects must budget for the travel associated with this one-day intensive review;

(b) The timeliness and effectiveness with which all requirements of the negotiated cooperative agreement have been or are being met by each Center; and

(c) In the case of the Development Center, the degree to which the project's design and methodology demonstrate the potential for advancing significant new knowledge.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities. However, section 661(e)(2) of IDEA makes the public comment requirements inapplicable to the priority in this notice.

Program Authority: 20 U.S.C. 1485 and 1487.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

I. Funding Opportunity Description

Purpose Of Program: The purpose of the Technology and Media Services for Individuals With Disabilities—Television Access competition is to: (1) Improve results for children with disabilities by promoting the development, demonstration, and use of technology; (2) support educational media activities designed to be of educational value to children with disabilities; (3) provide support for some captioning and video description; and (4) provide cultural experiences through appropriate nonprofit organizations.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv), this priority is from allowable activities specified in the statute (see sections 661(e)(2) and 687 of the Individuals with Disabilities Education Act, as amended (IDEA)).

Absolute Priority: For FY 2004 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technology and Media Services for Individuals With Disabilities—Television Access

Background: The Federal Communications Commission (FCC) is primarily responsible for implementing and monitoring the closed captioning requirements of the Telecommunications Act of 1996. In this Act, Congress generally requires that programming be captioned, regardless of distribution technology, to ensure access to persons with hearing disabilities.

In this Act, Congress recognized that, in some situations, requiring programming to be captioned might prove economically burdensome to video programming providers and owners. For this reason, Congress also authorized the FCC to adopt exemptions from the general captioning requirements for programs, and classes of programs, for which the FCC determines that the provision of captioning would be economically burdensome to the provider or owner of such programming. In addition, the FCC has promulgated rules for real-time captioning, which typically uses stenography but includes any methodology, to convert the entire audio portion of a live program to captions. For a fuller explanation of the FCC's requirements on captioning, please refer to <http://www.fcc.gov/cgb/consumerfacts/closedcaption.html>.

On July 21, 2000, the FCC also adopted rules to make television more accessible to people with visual disabilities by mandating that a certain amount of programming contain video description. However, in November 2002, a Federal court struck down these rules. Thus, FCC accessibility rules do not currently require video description.

Priority: Under this priority, which supports cooperative agreements, an applicant may address one or both of the following:

(a) Real-time captioning of locally produced news and public information television programming that, under the FCC's captioning requirements, is not required to be real-time captioned.

(b) Describing, or captioning and describing, widely available children's educational programs. Only children's educational programming that would not otherwise be captioned to meet the FCC's captioning requirements, or is specifically exempt from the FCC's captioning requirements, is eligible to be captioned.

A project must do the following:

(a) For children's educational programs, include criteria for selecting programs that have high educational
